The Global Findex Database 2017 Asli Demirguc-Kunt, Leora Klapper, Dorothe Singer, Saniya Ansar, 2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

The Great Inflation Michael D. Bordo,Athanasios Orphanides,2013-06-28 Controlling inflation is among the most important objectives of economic policy. By maintaining price stability, policy makers are able to reduce uncertainty, improve price-monitoring mechanisms, and facilitate more efficient planning and allocation of resources, thereby raising productivity. This volume focuses on understanding the causes of the Great Inflation of the 1970s and '80s, which saw rising inflation in many nations, and which propelled interest rates across the developing world into the double digits. In the decades since, the immediate cause of the period's rise in inflation has been the subject of considerable debate. Among the areas of contention are the role of monetary policy in driving inflation and the implications this had both for policy design and for evaluating the performance of those who set the policy. Here, contributors map monetary policy from the 1960s to the present, shedding

light on the ways in which the lessons of the Great Inflation were absorbed and applied to today's global and increasingly complex economic environment.

Fast Money Schemes John Cox,2018-10-02 A history and anthropological analysis of one of Papua New Guinea's worst Ponzi schemes in the late 1990s. In the late 1990s and early 2000s a wave of Ponzi schemes swept through Papua New Guinea, Australia, and the Solomon Islands. The most notorious scheme, U-Vistract, attracted many thousands of investors, enticing them with promises of one percent interest to be paid monthly. Its founder, Noah Musingku, was a charismatic leader who promoted the scheme as a form of Christian mission and as the basis for establishing an independent kingdom. *Fast Money Schemes* uses in-depth interviews with investors, newspaper accounts, and participant observation to understand the scheme's appeal from the point of view of those who invested and lost, showing that organizers and investors alike understood the scheme as a way of accessing and participating in a global economy. John Cox delivers a "post-village" ethnography that gives insight into the lives of urban, middle-class Papua New Guineans, a group that is not familiar to US readers and that has seldom been a focus of anthropological interest. The book's concern with understanding the interweaving of morality, finance, and aspirations shared by a global cosmopolitan middle class has wide resonance beyond studies of Papua New Guinea and anthropology.

U.S. Investors' Emerging Market Equity Portfolios Ms.Hali J. Edison,Mr.Francis E. Warnock,2003-12-01 We analyze a unique data set and uncover a remarkable result that casts a new light on the home bias phenomenon. The data are comprehensive, security-level holdings of emerging market equities by U.S. investors. We document, as expected, that at a point in time U.S. portfolios are tilted towards firms that are large, have fewer restrictions on foreign ownership, or are cross-listed on a U.S. exchange. The size of the cross-listing effect is striking. In contrast to the well-documented

underweighting of foreign stocks, emerging market equities that are cross-listed on a U.S. exchange are incorporated into U.S. portfolios at full international capital asset pricing model (CAPM) weights. Our results suggest that information asymmetries play an important role in equity home bias and that the benefits of international risk sharing are limited to select firms.
