The Cat Sitter and the Canary John Clement, Blaize Clement, 2016-12-20 In this installment in the series, Dixie finds a tall, handsome tourist loitering around the home of one of her long-time clients. He tells her he's just arrived from Scotland and that he's lost his glasses, which presumably explains why he can't find the house he rented for his seaside vacation. Dixie points him to the bungalow across the street (but not before rebuffing a few of the sexy Scotsman's passes) and then continues about her business. She doesn't think about him again until she stumbles upon a dead body in her client's front hall--Amazon.com.

The Stuarts in 100 Facts Andrea Zuvich, 2015-09-15 Discover the history behind the facts

The J Curve Ian Bremmer, 2006-09-15 Locate nations on the J Curve -- left for authoritarian, right for democratic. Then figure out how to force those on the left to open their societies, rather than encouraging them to shut them tighter by further isolating them. The West's isolation of Kim Jong-il's North Korea gives him the cover he needs to extend his brutal regime (the mistake the U.S. made for a long time with Saddam Hussein and Castro); in Saudi Arabia, western governments should encourage manageable change before the country breaks apart; they should help strengthen China's economy so it can further liberalize; they must encourage Israel to decide what kind of country it will be. Filled with imaginative and surprising examples of how to correct outworn political ideas, *The J Curve* points the way for western governments to lead the way to a realistic political balance and a healthier economic future.

Dr James Barry Michael Du Preez, Jeremy Dronfield, 2017 A Sunday Times Book of the Year As featured on the BBC Radio 2 Book Club *Dr James Barry*: Inspector General of Hospitals, army surgeon, duellist, reformer, ladykiller, eccentric. He performed the first successful Caesarean in the British Empire, outraged the military establishment and gave Florence Nightingale a dressing down at Scutari. At home he was surrounded by a menagerie of animals, including a cat, a goat, a parrot and a terrier. Long ago in Cork, Ireland, he had also been a mother. This is the amazing tale of Margaret Anne Bulkley, the young woman who broke the rules of Georgian society to become one of the most respected surgeons of the century. In an extraordinary life, she crossed paths with the British Empire's great and good, royalty and rebels, soldiers and slaves. A medical pioneer, she rose to a position that no woman before her had been allowed to occupy, but for all her successes, her long, audacious deception also left her isolated, even costing her the chance to be with the man she loved.

Plutocrats Chrystia Freeland, 2012-10-11 A Financial Times Best Book of the Year Shortlisted for the Lionel Gelber Prize
There has always been some gap between rich and poor in this country, but recently what it means to be rich has changed dramatically. Forget the 1 percent—Plutocrats proves that it is the wealthiest 0.1 percent who are outpacing the rest of us at breakneck speed. Most of these new fortunes are not inherited, amassed instead by perceptive businesspeople who see themselves as deserving victors in a cutthroat international competition. With empathy and intelligence, Plutocrats reveals the consequences of concentrating the world's wealth into fewer and fewer hands. Propelled by fascinating original interviews with the plutocrats themselves, Plutocrats is a tour de force of social and economic history, the definitive examination of inequality in our time.

Motivating Students to Learn Kathryn R. Wentzel, 2014-02-18 Written specifically for teachers, Motivating Students to Learn offers a wealth of research-based principles on the subject of student motivation for use by classroom teachers. Now in its fourth edition, this book discusses specific classroom strategies by tying these principles to the realities of contemporary schools, curriculum goals, and classroom dynamics. The authors lay out effective extrinsic and intrinsic strategies to guide teachers in their day-to-day practice, provide guidelines for adapting to group and individual differences, and discuss ways to reach students who have become discouraged or disaffected learners. This edition features new material on the roles that classroom goal setting, developing students' interest, and teacher-student and peer relationships play in student motivation. It has been reorganized to address six key questions that combine to explain why students may or may not be motivated to learn. By focusing more closely on the teacher as the motivator, this text presents a wide range of motivational methods to help students see value in the curriculum and lessons taught in the classroom.

The Polished Hoe Austin Clarke, 2003-09-03 Winner of the 2002 Scotiabank Giller Prize and of the 2003 Commonwealth Writers' Prize: Best Book (Canada and the Caribbean) When an elderly Bimshire village woman calls the police to confess to a murder, the result is a shattering all-night vigil that brings together elements of the African diaspora in one epic sweep. Set on the post-colonial West Indian island of Bimshire in 1952, The Polished Hoe unravels over the course of 24 hours but spans the lifetime of one woman and the collective experience of a society informed by slavery. As the novel opens, Mary Mathilda is giving confession to Sargeant, a police officer she has known all her life. The man she claims to have murdered is Mr. Belfeels, the village plantation owner for whom she has worked for more than thirty years. Mary has also been Mr. Belfeels' mistress for most of that time and is the mother of his only son, Wilberforce, a successful doctor. What transpires through Mary's words and recollections is a deep meditation about the power of memory and the indomitable strength of the human spirit. Infused with Joycean overtones, this is a literary masterpiece that evokes the sensuality of the tropics and the tragic richness of Island culture.

Kingscastle Sophia Holloway,2021-11-18 It is a truth universally acknowledged that love is never smooth sailing. Captain William Hawksmoor of the Royal Navy never expected to inherit Kingscastle, his family's estate, and finds himself all at sea when he does so. Especially when he learns that he must marry within a year or be forever dealing with trustees. As the new Marquis of Athelney, the captain takes command of Kingscastle and discovers much to be done to set it in order. He must also contend with his aunt, Lady Willoughby Hawksmoor, who is determined that her daughter will be his wife. When she discovers he is far more interested in Eleanor Burgess, her underpaid and much put-upon companion, Lady Willoughby shows she will stop at nothing to keep them apart.

Australian Assassins, Part II: A review of the new assassin spider genus *Zephyrarchaea* (Araneae, Archaeidae) from southern Australia Michael G. Rix,Mark S. Harvey,2012-05-07 The Assassin Spiders of the family Archaeidae from southern Australia are revised, with a new genus (*Zephyrarchaea* gen. n.) and nine new species described from temperate, mesic habitats in southern Victoria, South Australia and south-western Western Australia: *Z. austini* sp. n., *Z. barrettae* sp. n., *Z. grayi* sp. n., *Z. janineae* sp. n., *Z. marae* sp. n., *Z. marki* sp. n., *Z. melindae* sp. n., *Z. porchi* sp. n. and *Z. vichickmani* sp. n. Specimens of the type species, *Z. mainae* (Platnick, 1991), comb. n., are re-described from the Albany region of Western Australia, along with the holotype female of *Z. robinsi* (Harvey, 2002) comb. scribed species *Archaea hickmani* Butler, 1929 from Victoria is here recognised as a nomen dubium. A key to species and multi-locus molecular phylogeny complement the species-level taxonomy, with maps, habitat photos, natural history information and conservation assessments provided for all species.

Understanding the Divorce Cycle Nicholas H. Wolfinger,2005-06-06 Growing up in a divorced family leads to a variety of difficulties for adult offspring in their own partnerships. One of the best known and most powerful is the divorce cycle, the transmission of divorce from one generation to the next. This book examines how the divorce cycle has transformed family life in contemporary America by drawing on two national data sets. Compared to people from intact families, the children of divorce are more likely to marry as teenagers, but less likely to wed overall, more likely to marry people from divorced families, more likely to dissolve second and third marriages, and less likely to marry their live-in partners. Yet some of the adverse consequences of parental divorce have abated even as divorce itself proliferated and became more socially accepted. Taken together, these findings show how parental divorce is a strong force in people's lives and society as a whole.

A Voice Through a Cloud Denton Welch,2004 Denton Welch, one of the most gifted creative artists of his generation, died in 1948 at the age of thirty-one, leaving this, perhaps his finest work, almost but not quite completed. Under the thin disguise of fiction Denton Welch recreates the world of hospitals and nursing homes in which he spent so many months after the accident which was eventually to prove fatal to him. The details of daily routine, the fellow patients, the nurses and doctors, the comedies and tragedies which loom so large in the confined existence of the sick, all are described so vividly,

with so much humour and pathos, with so accurate a listening ear, so watchful and penetrating an eye, that it is almost impossible to believe that the experience on which it is based was one of long exhausting pain to the author himself, and that book was conceived in pain and carried through with failing physical powers.

Oil in the Sea III National Research Council, Transportation Research Board, Division on Earth and Life Studies, Marine Board, Ocean Studies Board, Committee on Oil in the Sea: Inputs, Fates, and Effects, 2003-03-14 Since the early 1970s, experts have recognized that petroleum pollutants were being discharged in marine waters worldwide, from oil spills, vessel operations, and land-based sources. Public attention to oil spills has forced improvements. Still, a considerable amount of oil is discharged yearly into sensitive coastal environments. Oil in the Sea provides the best available estimate of oil pollutant discharge into marine waters, including an evaluation of the methods for assessing petroleum load and a discussion about the concerns these loads represent. Featuring close-up looks at the Exxon Valdez spill and other notable events, the book identifies important research questions and makes recommendations for better analysis of—and more effective measures against—pollutant discharge. The book discusses: Input—where the discharges come from, including the role of two-stroke engines used on recreational craft. Behavior or fate—how oil is affected by processes such as evaporation as it moves through the marine environment. Effects—what we know about the effects of petroleum hydrocarbons on marine organisms and ecosystems. Providing a needed update on a problem of international importance, this book will be of interest to energy policy makers, industry officials and managers, engineers and researchers, and advocates for the marine environment.
