Lawrence Kaplan, Carol P. Kaplan

Taking Chances Karen M. O'Neill, Daniel J. Van Abs, 2016-06-03 Humanity is deeply committed to living along the world's shores, but a catastrophic storm like Sandy—which took hundreds of lives and caused many billions of dollars in damages—shines a bright light at how costly and vulnerable life on a shoreline can be. *Taking Chances* offers a wide-ranging exploration of the diverse challenges of Sandy and asks if this massive event will really change how coastal living and development is managed. Bringing together leading researchers—including biologists, urban planners, utilities experts, and climatologists, among others—*Taking Chances* illuminates reactions to the dangers revealed by Sandy. Focusing on New Jersey, New York, and other hard-hit areas, the contributors explore whether Hurricane Sandy has indeed transformed our perceptions of coastal hazards, if we have made radically new plans in response to Sandy, and what we think should be done over the long run to improve coastal resilience. Surprisingly, one essay notes that while a large majority of New Jerseyans identified Sandy with climate change and favored carefully assessing the likelihood of damage from future storms before rebuilding the Shore, their political leaders quickly poured millions into reconstruction. Indeed, much here is disquieting. One contributor points out that investors scared off from further investments on the shore are quickly replaced by new investors, sustaining or increasing the overall human exposure to risk. Likewise, a study of the Gowanus Canal area of Brooklyn shows that, even after Sandy swamped the area with toxic flood waters, plans to convert abandoned industrial lots around the canal into high-density condominiums went on undeterred. By contrast, utilities, emergency officials, and others who routinely make long-term plans have changed operations in response to the storm, and provide examples of adaptation in the face of climate change. Will Sandy be a tipping point in coastal policy debates—or simply dismissed as a once-in-a-century anomaly? This thought-provoking collection of essays in *Taking Chances* makes an important contribution to this debate.

Sandy Hook's Lost Highland Beach Resort Susan Sandlass Gardiner,2020-10-12 Built by William Sandlass during the Golden Age of the Jersey Shore, the Highland Beach excursion resort was an iconic landmark for more than seven decades. The resort put Sandy Hook on the map, as hordes of tourists were brought by trains, ferries and automobiles to soak up the sun and enjoy the plentiful amusements. At the once magical playground enjoyed by so many, the families dined and relaxed at Sandlass' Surf House and Basket Pavilion in the 1890s. Teenagers rocked away the night in the resort's Bamboo Room in the 1950s. Meet the characters who shaped the land and had the vision for a storied resort wiped away by time, technology and politics. Author Susan Sandlass Gardiner charts the rise and fall of Sandy Hook's historic resort paradise.

Oceanscapes Renate Aller, Jasmin Seck, Petra Roettig, Richard Bergen Woodward, 2011 Aller has been photographing the Atlantic Ocean for over a decade from a single point on the fabled Hamilton's coastline. The sublime beauty of this view, which Aller connects with the Romantic painter Caspar David Friedrich, is also a metaphor for the landscape of human emotions. Elaborately designed and printed, Aller's acclaimed series lends itself perfectly to the physical narrative of a photobook.

Loving Waters Across Religions McAnally, Elizabeth, 2019-02-20 McAnally presents an academically rigorous, spiritually rich approach to the myriad global issues related to water. The author draws from Christianity's sacramental consciousness of baptism, loving service of the Yamuna River in Hinduism, and the compassionate wisdom of the bodhisattva to develop 'an integral approach to water ethics.' Building on but distinct from the foundation laid by Christiana Zenner's *Just Water*, this book is a welcome addition to the growing field of concern surrounding global water crises--

Blink Malcolm Gladwell, 2007-04-03 From the #1 bestselling author of *The Bomber Mafia*, the landmark book that has revolutionized the way we understand leadership and decision making. In his breakthrough bestseller *The Tipping Point*, Malcolm Gladwell redefined how we understand the world around us. Now, in *Blink*, he revolutionizes the way we understand the world within. *Blink* is a book about how we think without thinking, about choices that seem to be made in an instant--in the blink of an eye--that actually aren't as simple as they seem. Why are some people brilliant decision makers, while others are consistently inept? Why do some people follow their instincts and win, while others end up stumbling into

error? How do our brains really work--in the office, in the classroom, in the kitchen, and in the bedroom? And why are the best decisions often those that are impossible to explain to others? In *Blink* we meet the psychologist who has learned to predict whether a marriage will last, based on a few minutes of observing a couple; the tennis coach who knows when a player will double-fault before the racket even makes contact with the ball; the antiquities experts who recognize a fake at a glance. Here, too, are great failures of blink: the election of Warren Harding; New Coke; and the shooting of Amadou Diallo by police. *Blink* reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of thin-slicing--filtering the very few factors that matter from an overwhelming number of variables.
