**I Have Been Assigned the Single Bird** Susan Cerulean, 2020-08-01 Susan Cerulean's memoir trains a naturalist's eye and a daughter's heart on the lingering death of a beloved parent from dementia. At the same time, the book explores an activist's lifelong search to be of service to the embattled natural world. During the years she cared for her father, Cerulean also volunteered as a steward of wild shorebirds along the Florida coast. Her territory was a tiny island just south of the Apalachicola bridge where she located and protected nesting shorebirds, including least terns and American oystercatchers. *I Have Been Assigned the Single Bird* weaves together intimate facets of adult caregiving and the consolation of nature, detailing Cerulean's experiences of tending to both. The natural world is the "sustaining body" into which we are born. In similar ways, we face not only a crisis in numbers of people diagnosed with dementia but also the crisis of the human-caused degradation of the planet itself, a type of cultural dementia. With *I Have Been Assigned the Single Bird*, Cerulean reminds us of the loving, necessary toil of tending to one place, one bird, one being at a time.

Water Giulio Boccaletti, 2022-10-18 Spanning millennia and continents, a revealing history that "tackles the most important story of our time: our relationship with water in a world of looming scarcity" (Kelly McEvers, NPR Host). Far more than a biography of its nominal subject ... The book stands as a compelling history of civilization itself. —The Wall Street Journal Book Review Writing with authority and brio, Giulio Boccaletti—honorary research associate at the Smith School of Enterprise and the Environment, University of Oxford—shrewdly combines environmental and social history, beginning with the earliest civilizations of sedentary farmers on the banks of the Nile, the Tigris, and the Euphrates Rivers. Even as he describes how these societies were made possible by sea-level changes from the last glacial melt, he incisively examines how

this type of farming led to irrigation and multiple cropping, which, in turn, led to a population explosion and labor specialization. We see with clarity how irrigation's structure informed social structure (inventions such as the calendar sprung from agricultural necessity); how in ancient Greece, the communal ownership of wells laid the groundwork for democracy; how the Greek and Roman experiences with water security resulted in systems of taxation; and how the modern world as we know it began with a legal framework for the development of water infrastructure. Extraordinary for its monumental scope and piercing insightfulness, *Water: A Biography* richly enlarges our understanding of our relationship to—and fundamental reliance on—the most elemental substance on earth.

*Muslims of the Heartland* Edward E. Curtis IV, 2023-11-07 Uncovers the surprising history of Muslim life in the early American Midwest The American Midwest is often thought of as uniformly white, and shaped exclusively by Christian values. However, this view of the region as an unvarying landscape fails to consider a significant community at its very heart. *Muslims of the Heartland* uncovers the long history of Muslims in a part of the country where many readers would not expect to find them. Edward E. Curtis IV, a descendant of Syrian Midwesterners, vividly portrays the intrepid men and women who busted sod on the short-grass prairies of the Dakotas, peddled needles and lace on the streets of Cedar Rapids, and worked in the railroad car factories of Michigan City. This intimate portrait follows the stories of individuals such as farmer Mary Juma, pacifist Kassem Rameden, poet Aliya Hassen, and bookmaker Kamel Osman from the early 1900s through World War I, the Roaring 20s, the Great Depression, and World War II. Its story-driven approach places Syrian Americans at the center of key American institutions like the assembly line, the family farm, the dance hall, and the public school, showing how the first two generations of Midwestern Syrians created a life that was Arab, Muslim, and American, all at the same time. *Muslims of the Heartland* recreates what the Syrian Muslim Midwest looked, sounded, felt, and smelled like—from the allspice-seasoned lamb and rice shared in mosque basements to the sound of the trains on the Rock Island Line rolling past the dry goods store. It recovers a multicultural history of the American Midwest that cannot be ignored.

*Sustainable Market Farming* Pam Dawling, 2013-02-01 Growing for 100 - the complete year-round guide for the small-scale market grower. Across North America, an agricultural renaissance is unfolding. Informed by the author's extensive experience growing a wide variety of fresh, organic vegetables and fruit to feed the approximately one hundred members of Twin Oaks Community in central Virginia, this practical guide provides: Detailed profiles of a full range of crops, addressing sowing, cultivation, rotation, succession, common pests and diseases, and harvest and storage Information about new, efficient

Rescuing the Planet Tony Hiss, 2021-03-30 An urgent, resounding call to protect 50 percent of the earth's land by 2050—thereby saving millions of its species—and a candid assessment of the health of our planet and our role in conserving it, from the award-winning author of *The Experience of Place* and veteran New Yorker staff writer. An upbeat and engaging account of the remarkable progress being made to preserve vast wild spaces for animals to roam. —The Wall Street Journal Beginning in the vast North American Boreal Forest that stretches through Canada, and roving across the continent, from the Northern Sierra to Alabama's Paint Rock Forest, from the Appalachian Trail to a ranch in Mexico, Tony Hiss sets out on a journey to take stock of the superorganism that is the earth: its land, its elements, its plants and animals, its greatest threats—and what we can do to keep it, and ourselves, alive. Hiss not only invites us to understand the scope and gravity of the problems we face, but also makes the case for why protecting half the land is the way to fix those problems. He highlights the important work of the many groups already involved in this fight, such as the Indigenous Leadership Initiative, the Yellowstone to Yukon Conservation Initiative, and the global animal tracking project ICARUS. And he introduces us to the engineers, geologists, biologists, botanists, oceanographers, ecologists, and other Half Earthers like Hiss himself who are allied in their dedication to the unifying, essential cause of saving our own planet from ourselves. Tender, impassioned, curious, and above all else inspiring, *Rescuing the Planet* is a work that promises to make all of us better citizens of the earth.

The Nature of Oaks Douglas W. Tallamy, 2021-03-30 “A timely and much needed call to plant, protect, and delight in these diverse, life-giving giants.” —David George Haskell, author of *The Forest Unseen* and *The Songs of Trees* With Bringing Nature Home, Doug Tallamy changed the conversation about gardening in America. His second book, the New York Times bestseller *Nature's Best Hope*, urged homeowners to take conservation into their own hands. Oaks sustain a complex and fascinating web of wildlife. *The Nature of Oaks* reveals what is going on in oak trees month by month, highlighting the seasonal cycles of life, death, and renewal. From woodpeckers who collect and store hundreds of acorns for sustenance to the beauty of jewel caterpillars, Tallamy illuminates and celebrates the wonders that occur right in our own backyards. Slow Knitting Hannah Thiessen, 2017-10-10 “Thiessen has done her research, and talked to people who truly have insight into the process of making both yarn and clothing.” —Modern Daily Knitting Like the “slow food” movement, Slow Knitting encourages knitters to step back, pare down, and celebrate the craftsmanship of their work. In five chapters centered around the tenets of slow knitting—sourcing carefully, making thoughtfully, thinking environmentally, experimenting fearlessly, and exploring openly—Hannah Thiessen challenges knitters of all skill levels to view their practice in a new way. Each chapter contains explorations of fiber types; profiles of well-known yarn types, makers, and yarn suppliers; and garment patterns inspired by the featured fibers. With contributions from knitting superstars Norah Gaughan, Bristol Ivy, and many others, Slow Knitting proposes an approach to knitting that is both minimalist and all-encompassing, and emphasizes what makes knitting a meditation, a passion, and a unique necessity. “Promotes the concept of ‘slow knitting’ which discards the pressure to produce prolifically and instead, revolves around the idea that thoughtfully produced yarn will result in better projects for you-the crafter.” —MarthaStewart.com

**Cuba (Winner of the Pulitzer Prize)** Ada Ferrer, 2022-06-28 In 1961, at the height of the Cold War, the United States severed diplomatic relations with Cuba, where a momentous revolution had taken power three years earlier. For more than half a century, the stand-off continued--through the tenure of ten American presidents and the fifty-year rule of Fidel Castro. His death in 2016, and the retirement of his brother and successor Raúl Castro in 2021, have spurred questions about the country's future. Meanwhile, politics in Washington--Barack Obama's opening to the island, Donald Trump's reversal of that policy, and the election of Joe Biden--have made the relationship between the two nations a subject of debate once more. Now, award-winning historian Ada Ferrer delivers an ambitious chronicle written for an era that demands a new reckoning with the island's past. Spanning more than five centuries, *Cuba: An American History* reveals the evolution of the modern nation, with its dramatic record of conquest and colonization, of slavery and freedom, of independence and revolutions made and unmade. Along the way, Ferrer explores the influence of the United States on Cuba and the many ways the island has been a recurring presence in US affairs. This is a story that will give Americans unexpected insights into the history of their own nation and, in so doing, help them imagine a new relationship with Cuba. Filled with rousing stories and characters, and drawing on more than thirty years of research in Cuba, Spain, and the United States--as well as the author's own extensive travel to the island over the same period--this is a stunning and monumental account like no other. --

*Will Bonsall's Essential Guide to Radical, Self-Reliant Gardening* Will Bonsall, 2015 Society does not generally expect its farmers to be visionaries. Perhaps not, but longtime Maine farmer and homesteader Will Bonsall does possess a unique clarity of vision that extends all the way from the finer points of soil fertility and seed saving to exploring how we can transform civilization and make our world a better, more resilient place. In *Will Bonsall's Essential Guide to Radical, Self-Reliant Gardening*, Bonsall maintains that to achieve real wealth we first need to understand the economy of the land, to realize that things that might make sense economically don't always make sense ecologically, and vice versa. The marketplace distorts our values, and our modern dependence on petroleum in particular presents a serious barrier to creating a truly sustainable agriculture. For him the solution is, first and foremost, greater self-reliance, especially in the areas of food and energy. By avoiding any off-farm inputs (fertilizers, minerals, and animal manures), Bonsall has learned how to practice a purely veganic, or plant-based, agriculture—not from a strictly moralistic or philosophical perspective, but because it makes good business sense: spend less instead of making more. What this means in practical terms is that Bonsall draws upon the fertility of on-farm plant materials: compost, green manures, perennial grasses, and forest products like leaves and ramial wood chips. And he grows and harvests a diversity of crops from both cultivated and perennial plants: vegetables, grains, pulses, oilseeds, fruits and nuts—even uncommon but useful permaculture plants like groundnut (*Apios*). In a friendly, almost conversational way, Bonsall imparts a wealth of knowledge drawn from his more than forty years of farming experience. My goal, he writes, is not to feed the world, but to feed myself and let others feed themselves. If we all did that, it might be a good beginning.
