**Encyclopedia of Chinese History** Michael Dillon, 2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty. The number of westerners travelling to China to study, for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture, society and economy and increasing coverage of contemporary China in the media. Our understanding of China's history has also been evolving. The study of history in the People's Republic of China during the Mao Zedong period was

strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers, there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang and Tibet that have played such an important role in the history of China Proper and will also include material on Taiwan, and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics and culture.

**Issues of Authenticity in Chinese Painting** Judith G. Smith, Wen Fong, 1999 Published in conjunction with a December 1999 symposium held at the Metropolitan Museum of Art, New York, and an exhibition, *The Artist as Collector: Masterpieces of Chinese Painting from the C.C. Wang Family Collection*. Twelve contributions give dissenting opinions regarding a book recently published by The Museum titled *Along the Riverbank*, which seeks to attribute the painting called *Riverbank* to the 10th-century landscape master Dong Yuan--an attribution that would call for the rewriting of early Chinese painting history. This volume contains 239 b&w illustrations to support the contributors' efforts to explain their opinions. Annotation copyrighted by Book News, Inc., Portland, OR

Asian Art Lark E. Mason, 2002 A specialist in Asian art at Sotheby's, Mason presents a very useful introduction to a complicated subject. He begins with an essay on the history of Asia, which despite its brevity will be useful for the collector targeted by this book. Individual chapters range from ceramics and metalwork to prints, paintings, and textiles; the chapter on *The Artisan and Craftsman* examines the quality, condition, and authenticity of works in areas such as arms, armor, glass, ivory, and jewelry. The book contains appendixes of chronological tables and major marks on Chinese and Japanese works of art, as well as an index and a fine bibliography. The narrative does not confuse readers new to the subject with excessive detail, and the photographs are clear and very instructive. A beautiful book at a reasonable price, this volume contains an amazing wealth of information on a very broad subject. Recommended for both public and academic libraries.-Martin Chasin, Adult Inst., Bridgeport, CT Copyright 2003 Reed Business Information.

**The Chain** Chien-Chi Chang, Cheryl Lai, 2002 In 1970, Ki Lun-Tai, an abbot in Kaohsiung, Taiwan, decided to become a Buddhist monk. He built a thatched hut in front of his house, adopted a schizophrenic as his disciple, and began to raise pigs and chickens with his new helper, whom he kept on a line of string, much like a leash. Within 20 years Li Kun-Tai, by now rechristened (by himself) Hieh Kai Feng, had 600 deranged helpers, most chained together, almost exclusively consigned to him by their families, distraught by the shame of having to look after lunatics, or socially unacceptable misfits. Ten years later, in

1999, Long Fa Tang - the Temple of the Dragon - was recognized as the largest chicken farm in Taiwan, with a million chickens laying eggs and defecating in almost equal proportions. They are tended by helpers from the 700 mental patients in the care of the Temple, wading through slurry, eggs and chicken corpses.

**Fire Toxicity** A A Stec, T R Hull, 2010-03-12 Toxic fire effluents are responsible for the majority of fire deaths, and an increasing large majority of fire injuries, driven by the widespread and increasing use of synthetic polymers. Fire safety has focused on preventing ignition and reducing flame spread through reducing the rate of heat release, while neglecting the important issue of fire toxicity. This is the first reference work on fire toxicity and the only scientific publication on the subject in the last 15 years. Assessment of toxic effects of fires is increasingly being recognised as a key factor in the assessment of fire hazards. This book raises important issues including the types of toxic effluents that different fires produce, their physiological effects, methods for generation and assessment of fire toxicity, current and proposed regulations and approaches to modelling the toxic impact of fires. The contributors to Fire toxicity represent an international team of the leading experts in each aspect of this challenging and important field. This book provides an important reference work for professionals in the fire community, including fire fighters, fire investigators, regulators, fire safety engineers, and formulators of fire-safe materials. It will also prove invaluable to researchers in academia and industry. Investigates the controversial subject of toxic effluents as the cause of the majority of fire deaths and injuries Describes the different types of toxic effluents and the specific fires that they produce, their physiological effects and methods for generation Provides an overview of national and international fire safety regulations including current and proposed regulations such as a standardized framework for prediction of fire gas toxicity

**Image and Graphics** Yao Zhao, Xiangwei Kong, David Taubman, 2017-12-29 This three-volume set LNCS 10666, 10667, and 10668 constitutes the refereed conference proceedings of the 9th International Conference on Image and Graphics, ICIG 2017, held in Shanghai, China, in September 2017. The 172 full papers were selected from 370 submissions and focus on advances of theory, techniques and algorithms as well as innovative technologies of image, video and graphics processing and fostering innovation, entrepreneurship, and networking.

**Chinese Herbal Formulas and Applications** John K. Chen, Tina T. Chen, 2009-01-01 Companion volume to Chinese Medical Herbology and Pharmacology. This book takes the next step in presenting not only the traditional usage of Chinese herbal formulas, but a combined perspective of the pharmacological effects of formulas themselves with clinically relevant

research evidence. As competencies in multiple health care disciplines continue to be raised the need for integrative understandings rise with it. Chinese Herbal Formulas and Applications brings together Chinese Herbal Medicine and expands this with the pharmaceutical effects and clinical research findings to use herbal medicines exclusively or in combination with the allopathic medicine. Enhancing the understanding of herbs and herbal formulas from multiple perspectives, Chinese Herbal Formulas and Applications is a resource for improved patient care and therapeutic outcome. OUTSTANDING FEATURES: Comprehensive explanation of the pharmacology of herbal medicinal formulas, and concurrent uses of herbal formulas and pharmaceuticals Documentation from clinical studies and published research Profiles of the doctors without whom there would be no Chinese medicine: insights into the historical context and backgrounds of those famous individuals who shaped our understanding of disease patterns, treatment strategies and herbal formulas. Contributions from over 100 academic, clinical, research and regulatory professionals who reviewed the text before publication, to complement the work of the authors. PLUS Detailed traditional and modern uses, preparation, administration, dosages, combinations, cautions, contraindications and toxicology. Authors comments are drawn from clinical experience. Appendices on herbal medicine for pregnancy and postpartum care and much more.

*Geology of Coal Deposits of South Limburg, The Netherlands* J.H.L. Voncken, 2019-04-17 This book offers an up-to-date overview of the coal deposits of South Limburg (Netherlands), the Aachen area (Germany), and the Campine area (Belgium). Although the amount of available literature on these coal deposits is quite vast, the majority of the texts date back to the mid-twentieth century, and most publications focus more on the stratigraphy of the coal layers and the rank of the coal. Moreover, the concept of continental drift is largely ignored in these publications. In addition to providing updated information, this book also discusses coal mining in these regions; the formation and petrography of coal; and the geological evolution of Western Europe/the Netherlands, Germany and Belgium. In order to explain the tropical nature of the flora in the Carboniferous period, paleogeographic aspects are also taken into account.

Power Aware Computing Robert Graybill, Rami Melhem, 2013-04-17 With the advent of portable and autonomous computing systems, power consumption has emerged as a focal point in many research projects, commercial systems and DoD platforms. One current research initiative, which drew much attention to this area, is the Power Aware Computing and Communications (PAC/C) program sponsored by DARPA. Many of the chapters in this book include results from work that have been supported by the PACIC program. The performance of computer systems has been tremendously improving while the size and weight of such systems has been constantly shrinking. The capacities of batteries relative to their sizes and weights has been also improving but at a rate which is much slower than the rate of improvement in computer performance and the rate of shrinking in computer sizes. The relation between the power consumption of a computer system and its performance and size is a complex one which is very much dependent on the specific system and the technology used to build

that system. We do not need a complex argument, however, to be convinced that energy and power, which is the rate of energy consumption, are becoming critical components in computer systems in general, and portable and autonomous systems, in particular. Most of the early research on power consumption in computer systems addressed the issue of minimizing power in a given platform, which usually translates into minimizing energy consumption, and thus, longer battery life.

**A Materia Medica for Chinese Medicine** Carl-Hermann Hempen, Toni Fischer (MD.), 2009-01-01 Phytotherapy or herbal medicine is the most important therapy within Chinese medicine and is being used increasingly in the West. A Materia Medica for Chinese Medicine: plants, minerals and animal products describes 400 of the most important plants, minerals and animal substances used as treatments by Chinese medical practitioners. The items included have been selected according to their degree of clinical relevance. Each remedy is clearly described and illustrated on two facing pages, making this an easily accessible reference for both students and practitioners of Chinese herbal medicine. The clearly laid out text presents the following details for each herb or substance included: a detailed description of the characteristic features indications for safe use medicinal and toxic effects possible combinations with other substances full-colour illustrations, generally two for each substance, showing the detailed characteristics of the item described A Materia Medica for Chinese Medicine has been written by two medically trained doctors who have worked as TCM therapists specializing in the use of Chinese herbs for more than 30 years. Based on their many years of teaching and practice, the book has been carefully compiled and designed to provide a concise and accurate practice-based reference for both students and practitioners.

**Computer Vision - ECCV 2020** Andrea Vedaldi, Horst Bischof, Thomas Brox, Jan-Michael Frahm, 2020-11-12 The 30-volume set, comprising the LNCS books 12346 until 12375, constitutes the refereed proceedings of the 16th European Conference on Computer Vision, ECCV 2020, which was planned to be held in Glasgow, UK, during August 23-28, 2020. The conference was held virtually due to the COVID-19 pandemic. The 1360 revised papers presented in these proceedings were carefully reviewed and selected from a total of 5025 submissions. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image reconstruction; object recognition; motion estimation.

*Three Kingdoms* Guanzhong Luo, 2020-05-12 "A material epic with an astonishing fidelity to history.—New York Times Book Review Three Kingdoms tells the story of the fateful last reign of the Han dynasty (206 B.C.–A.D. 220), when the

Chinese empire was divided into three warring kingdoms. Writing some twelve hundred years later, the Ming author Luo Guanzhong drew on histories, dramas, and poems portraying the crisis to fashion a sophisticated, compelling narrative that has become the Chinese national epic. This abridged edition captures the novel's intimate and unsparing view of how power is wielded, how diplomacy is conducted, and how wars are planned and fought. As important for Chinese culture as the Homeric epics have been for the West, this Ming dynasty masterpiece continues to be widely influential in China, Korea, Japan, and Vietnam and remains a great work of world literature.

**A Military History of China** David Andrew Graff, Robin Higham, 2012-03-09 Gaining an understanding of China's long and sometimes bloody history can help to shed light on China's ascent to global power. Many of China's imperial dynasties were established as the result of battle, from the chariot warfare of ancient times to the battles of the Guomindang (KMT) and Communist regimes of the twentieth century. China's ability to sustain complex warfare on a very large scale was not emulated in other parts of the world until the Industrial Age, despite the fact that the country is only now rising to economic dominance. In *A Military History of China, Updated Edition*, David A. Graff and Robin Higham bring together leading scholars to offer a basic introduction to the military history of China from the first millennium B.C.E. to the present. Focusing on recurring patterns of conflict rather than traditional campaign narratives, this volume reaches farther back into China's military history than similar studies. It also offers insightful comparisons between Chinese and Western approaches to war. This edition brings the volume up to date, including discussions of the Chinese military's latest developments and the country's most recent foreign conflicts.
