Image Macros: Eine neue Form des Witzes Nicole Friedrich, 2015-02-01 Jeder, der im Internet und in sozialen Netzwerken unterwegs ist, kennt sie: diese sich schnell und viral verbreitenden Bilder, Videos, Sprüche oder Witze. Doch nur wenige wissen, dass es sich dabei um sogenannte Memes handelt. Durch den Biologen Richard Dawkins in den 1970ern als

eine kulturelle Evolution analog zur biologischen Evolution identifiziert und beschrieben, hat die Memetik bis Anfang der 90er Jahre weitestgehend an Bedeutung verloren. Mit dem Aufkommen des Web 2.0 und dessen neuen Funktionen des einfachen Verbreitens von Inhalten aller Art, erfuhr die Memetik einen erneuten Boom und bietet eine allumfassende Technik, um die Eigenheiten des Internets zu analysieren. Da das Internet eine geeignete Plattform für Humor und Komik bietet, will die vorliegende Arbeit am Beispiel der Image Macros erklären, wie es überhaupt dazu kommt und welcher Techniken sich Memes bedienen, um bei ihren Konsumenten Komik zu erzeugen. Was sind Memes? Was sind Image Macros? Welche Rolle spielt die Internetgemeinschaft und welcher der Humor? All dies soll hier beantwortet und als wissenschaftlicher Einstieg in die Thematik des Internethumors gesehen werden.

Make Your Bed Admiral William H. McRaven, 2017-04-04 Based on a Navy SEAL's inspiring graduation speech, this #1 New York Times bestseller of powerful life lessons should be read by every leader in America (Wall Street Journal). If you want to change the world, start off by making your bed. On May 17, 2014, Admiral William H. McRaven addressed the graduating class of the University of Texas at Austin on their Commencement day. Taking inspiration from the university's slogan, What starts here changes the world, he shared the ten principles he learned during Navy Seal training that helped him overcome challenges not only in his training and long Naval career, but also throughout his life; and he explained how anyone can use these basic lessons to change themselves-and the world-for the better. Admiral McRaven's original speech went viral with over 10 million views. Building on the core tenets laid out in his speech, McRaven now recounts tales from his own life and from those of people he encountered during his military service who dealt with hardship and made tough decisions with determination, compassion, honor, and courage. Told with great humility and optimism, this timeless book provides simple wisdom, practical advice, and words of encouragement that will inspire readers to achieve more, even in life's darkest moments. Powerful. --USA Today Full of captivating personal anecdotes from inside the national security vault. -Washington Post Superb, smart, and succinct. --Forbes

Building the Hyperconnected Society- Internet of Things Research and Innovation Value Chains, Ecosystems and Markets Ovidiu Vermesan, Peter Friess, 2022-09-01 This book aims to provide a broad overview of various topics of Internet of Things (IoT), ranging from research, innovation and development priorities to enabling technologies, nanoelectronics, cyber-physical systems, architecture, interoperability and industrial applications. All this is happening in a global context, building towards intelligent, interconnected decision making as an essential driver for new growth and co-competition across a wider set of markets. It is intended to be a standalone book in a series that covers the Internet of Things activities of the IERC - Internet of Things European Research Cluster from research to technological innovation, validation and deployment. The book builds on the ideas put forward by the European Research Cluster on the Internet of Things Strategic Research and Innovation Agenda, and presents global views and state of the art results on the challenges facing the research, innovation, development

and deployment of IoT in future years. The concept of IoT could disrupt consumer and industrial product markets generating new revenues and serving as a growth driver for semiconductor, networking equipment, and service provider end-markets globally. This will create new application and product end-markets, change the value chain of companies that creates the IoT technology and deploy it in various end sectors, while impacting the business models of semiconductor, software, device, communication and service provider stakeholders. The proliferation of intelligent devices at the edge of the network with the introduction of embedded software and app-driven hardware into manufactured devices, and the ability, through embedded software/hardware developments, to monetize those device functions and features by offering novel solutions, could generate completely new types of revenue streams. Wir drehen am Klima - na und? Gerd Ganteför, 2015-12-03 Dem Klimawandel aktiv begegnen - das neue Buch vom Erfolgsautor Gerd Ganteför Der Klimawandel ist nicht aufzuhalten - in weiten Teilen der Bevölkerung und der Fachwelt ist diese Aussage unbestritten. Aber was sind die genauen Ursachen? Vor allem, was kann man dagegen tun? Die Lösung scheint so einfach und liegt vermeintlich auf der Hand: Die Energiewende muss kommen, Wind- und Sonnenenergie endlich maximal genutzt werden. Doch ist das im Weltmaßstab überhaupt möglich? Im Angesicht der heutigen globalen Probleme, Ressourcenverknappung, Armut und Bevölkerungswachstum schwanken unsere Zukunftsvisionen zwischen absoluten Horrorszenarien und utopischen Träumereien. Auf der einen Seite scheinen wir in dem Teufelskreislauf gefangen, der uns momentan zwingt, auf die fossilen Rohstoffe Erdöl, Erdgas und Kohle zurückzugreifen, was die Klimakatastrophe mit gewaltigeren Stürmen, vermehrten Dürren und Überschwemmungen noch beschleunigen und verschlimmern würde. Dem gegenüber stehen die Möglichkeiten einer (vermeintlich) ökologischen Lebensweise, die auf Energie weitgehend verzichtet, oder die Entwicklung zu einer hochtechnisierten Welt mit noch höherem Energiekonsum. Quo vadis, terra? - Zur Zukunft unseres Planeten Der Autor stellt sich dieser Frage unbefangen, überrascht mit frischen Ideen und skizziert mögliche Lösungen für die großen Herausforderungen im 21. Jahrhundert. Gerd Ganteför analysiert die möglichen Szenarien mit dem nötigen Abstand des Beobachters. Er erklärt, warum die Energiewende in ihrer gegenwärtigen Form zum Scheitern verurteilt ist und zu spät kommt, um die Klimaerwärmung noch aufhalten zu können. Jedoch betrachtet er auch Alternativ-Szenarien und zeigt auf, dass sich das globale Klima auch ganz anders entwickeln könnte, und belegt dies mit gut erforschten Beispielen. Gerd Ganteför gibt mutige Anstöße für eine längst überfällige Wertediskussion: Er thematisiert unseren Luxus als Ursache vieler Probleme, fragt, wie weit Freiheit und Selbstbestimmung gehen dürfen, und ob letzten

Endes die Natur oder der Mensch das Maß aller Dinge sein sollte. Heißes Eisen Klimakontrolle Kann - und darf - der Mensch mit technischen Mitteln Wetter und Klima kontrollieren? Gerd Ganteför zeigt, dass dies nicht nicht nur möglich, sondern nötig ist, um der Menschheit angesichts globaler Phänomene wie Bevölkerungswachstum und Urbanisierung eine langfristige Perspektive zu bieten.

ERNEUERBARE ENERGIEN FÜR REGIONEN Hartmut Dumke , 2020-12-20 Every human action consumes energy: heating, cooling, hot water, electricity and transport requirements – all of these require energy. But climate change demands that our energy needs also change, that we use more and more renewable energies and less and less CO₂. To do this, we must look at area requirements. In other words, what area per energy quantity per year does a renewable energy source require? Which sources require additional sealing and land use? How strongly does the production of renewable energy compete with other area and land uses? And what are the consequences for spatial and regional planning? The following publication will help answer these questions by providing a catalogue of area requirements for renewable energy sites. In addition, it makes clear that achieving integrated and regional energy planning involves not only energy technology, but requires further research into planning and participation processes. The concept of a regional cooperation area shows great potential in this aspect.

Forensic Criminology is essential for students of criminology, criminal justice, criminal investigations and crime science. It is also useful to those criminal justice practitioners wishing to gain a more in-depth understanding of the links between criminology, criminal investigations and forensics techniques.
