Birds and Birding at Cape May Clay Sutton, Patricia Sutton, 2006 First-ever birding guide to this celebrated site Insider advice on 33 popular places and lesser-known hot spots Describes birding opportunities any time of the year Geography, topography, weather patterns, and unique natural features make Cape May, New Jersey, one of the most important birding sites in North America. Throughout the year thousands of birders travel to Cape May from around the country--and across the ocean--to witness the arrival of tens of thousands of raptors, songbirds, shorebirds, and seabirds. In this guide, Cape May birders can find out exactly when and where in the region to go, what birds they're likely to see, why the birds are there, and what factors could affect the birds' behavior. Filled with the authors' photos, this book offers insider information that will help any birder make the most of a visit. It features a complete Cape May bird list and a description of the region's history complemented by images that show how Cape May has changed over the years, and how it has stayed the same.

Season at the Point Thomas Connor, 1994 Conveys the story of the birds and birders that gather in Cape May Point, N.J., describing the adaptations, migratory patterns, and aerodynamics of the birds.

Birds of Cape Cod and the Islands Roger S. Everett, 2006 Of the 800+ species of birds recorded in North America, almost 400 have been seen on Cape Cod, Martha's Vineyard, and Nantucket. It is little wonder, then, that birders (ornithologists) flock to Massachusetts to see the spectacular aviary display! As Priscilla Bailey notes in her Preface, this new book brings together aspects of field guide, travelogue, and photo-essay. Nearly 300 varieties of birds, both native and migratory, and some rare visitors from far-off lands, were photographed in their Cape and Islands habitats. The images reveal beauty, both in the birds themselves and the artistic eye of the photographer. For convenience, the book is divided into various habitat settings: the yard, marshes and ponds, the seashore, fields, and forests. In addition one chapter documents the birds that are rarely seen on the Cape & Islands. Also, maps show the best sites for viewing the birds in nature. For bird lovers, visitors to the area, and connoisseurs of fine wildlife photography, this will be a welcomed treasure, enjoyed time and again.

Birds of Cape May, New Jersey Kevin T. Karlson, 2010 New Jersey's southern Cape is host to huge annual bird migrations, making Cape May one of the best bird-watching locations in the world. Over 400 species have been spotted here. See exquisite photographs that present shore, prey, and song birds commonly seen at Cape May in lively action and flight

themes. Birds are shown in foliage appropriate to different seasons, with anecdotes and natural history in concise photo captions. This is a treasure for all who love birds and wildlife photography.

Waiting for a Warbler Sneed B. Collard III, 2021-02-02 Short listed for the Green Earth book award In early April, as Owen and his sister search the hickories, oaks, and dogwoods for returning birds, a huge group of birds leaves the misty mountain slopes of the Yucatan peninsula for the 600-mile flight across the Gulf of Mexico to their summer nesting grounds. One of them is a Cerulean warbler. He will lose more than half his body weight even if the journey goes well. Aloft over the vast ocean, the birds encourage each other with squeaky chirps that say, "We are still alive. We can do this." Owen's family watches televised reports of a great storm over the Gulf of Mexico, fearing what it may mean for migrating songbirds. In alternating spreads, we wait and hope with Owen, then struggle through the storm with the warbler. This moving story with its hopeful ending appeals to us to preserve the things we love. The backmatter includes a North American bird migration map, birding information for kids, and guidance for how native plantings can transform yards into bird and wildlife habitat.

We Have a Dream Mya-Rose Craig, 2022-04-12 Thirty young environmental activists share their dreams with voice of a generation Mya-Rose Craig Indigenous people and people of color are disproportionately affected by climate change. And yet they are underrepresented within the environmental movement. But not anymore. Written by the extraordinary environmental and campaigner for equal rights Mya-Rose Craig—aka Birdgirl—this book profiles 30 young environmental activists who are Indigenous people or people of color, from communities on the frontline of global climate change. Each speaks to the diverse set of issues they are fighting for, from water conservation, to deforestation, to indigenous rights, and shares their dream . . . A dream for climate justice. A dream for a healthy planet. A dream for a fairer world, for all. This is the first book from Craig, who shared a stage with Greta Thunberg in 2019's climate strikes. US-based activists profiled include Marshallese ocean activist Litokne Kabua; @ThisIsZeroHour founder Zanagee Artis; indigenous rights activists Thomas Tonatiuh Lopez Jr., and Caitlyn Baikie; climate justice activist Rebeca Sabnam, and clean water activist Autumn Peltier.

100 Parks, 5,000 Ideas Joe Yogerst, 2019 A guide to the best parks in the United States and Canada, including activity

and accommodation information; information on nearby attractions; top ten lists; and information on local fare--

The Chamberlain Guide to Birding Gauteng Etienne Marais, 2008 The greater Gauteng region includes Pretoria and Johannesburg. While often overlooked by birders on their travels further afield, this region, with its diversity of natural and modified habitats, offers over 450 bird species. This book provides 101 birding sites with details on access, accommodation, habitats and specials of the region.

Woodpeckers Sneed B. Collard, 2018 If you see a bird standing on the side of a tree banging its beak against the trunk, chances are you're watching a woodpecker. Woodpeckers not only dazzle us with their good looks and personality, they exhibit some of the most interesting behaviors in the animal world. Explore this dynamic, exciting group of birds with award-winning children's science writer Sneed B. Collard III. Discover what scientists have learned about woodpeckers, why woodpeckers drill into trees, and the best way to serve ants at your next sleep-over. Spectacular photographs will help ensure that these birds drill deep into your imagination.

Plain Diversity Steven M. Nolt, Thomas J. Meyers, 2007-06-01 Plain and simple. American popular culture has embraced a singular image of Amish culture that is immune to the complexities of the modern world: one-room school houses, horses and buggies, sound and simple morals, and unfaltering faith. But these stereotypes dangerously oversimplify a rich and diverse culture. In fact, contemporary Amish settlements represent a mosaic of practice and conviction. In the first book to describe the complexity of Amish cultural identity, Steven M. Nolt and Thomas J. Meyers explore the interaction of migration history, church discipline, and ethnicity in the community life of nineteen Amish settlements in Indiana. Their extensive field research reveals the factors that influence the distinct and differing Amish identities found in each settlement and how those factors relate to the broad spectrum of Amish settlements throughout North America. Nolt and Meyers find Amish children who attend public schools, Amish household heads who work at luxury mobile home factories, and Amish women who prefer a Wal-Mart shopping cart to a quilting frame. Challenging the plain and simple view of Amish identity, this study raises the intriguing question of how such a diverse people successfully share a common identity in the absence of uniformity.

Footprints of War David Andrew Biggs, 2018-10-08 When American forces arrived in Vietnam, they found themselves embedded in historic village and frontier spaces already shaped by many past conflicts. American bases and bombing targets followed spatial and political logics influenced by the footprints of past wars in central Vietnam. The militarized landscapes here, like many in the world's historic conflict zones, continue to shape post-war land-use politics. Footprints of War traces the long history of conflict-produced spaces in Vietnam, beginning with early modern wars and the French colonial invasion in 1885 and continuing through the collapse of the Saigon government in 1975. The result is a richly textured history of militarized landscapes that reveals the spatial logic of key battles such as the Tet Offensive. Drawing on extensive archival work and years of interviews and fieldwork in the hills and villages around the city of Hue to illuminate war's footprints, David Biggs also integrates historical Geographic Information Systems (GIS) data, using aerial, high-altitude, and satellite imagery to render otherwise placeless sites into living, multidimensional spaces. This personal and multilayered approach yields an innovative history of the lasting traces of war in Vietnam and a model for understanding other militarized landscapes.
