Joining Forces Howard Fradkin, Dr.,2012-11-05 This inspirational book was written to empower male survivors of sexual victimization at any age to overcome the effects of trauma and learn to thrive. Male survivors often struggle to feel any sense of hope for the future, so Joining Forces is designed to inspire them and their allies with easily mastered skills developed over the course of psychologist Dr. Howard Fradkin's 30-year career, and the real-life experiences of other survivors who have learned to thrive. Each chapter invites survivors to dare to dream that they can take another step in their healing process by leaving their isolation behind; challenging their dysfunctional beliefs and replacing them with healthier, functional messages; practicing healing exercises; reading about the struggles and successes of men just like them; and learning how to build hope through the use of affirmations. This book is unique in that it is based on the experiences of over 800 participants in MaleSurvivor Weekends of Recovery. The tools taught during those workshops, plus many more developed through Dr. Fradkin's clinical experiences, are presented so that each survivor has an opportunity to use coping skills as he faces the challenges of his recovery. Survivors and their allies will learn that they are not alone in their struggles and that others have walked in their path, become stronger, and found a sense of freedom. They'll read about how to make healthier choices to enhance their relationships, emotional functioning, and job performance and to thrive in their lives.

Joining Forces Mitchell Lee Marks,Philip H. Mirvis,2010-07-30 If 75 percent of all mergers fail, what makes the other 25 percent succeed? Mergers, acquisitions, and alliances are more vital today than ever before in driving business success. This indispensable guide offers proven strategies and sound solutions to the multitude of integration issues that inevitably arise, and shows how to create a combined business that meets its strategic and financial objectives, competes better, and offers personal and organizational enhancements. Dubbed merger mavens by Fortune magazine, the authors report lessons learned from their experience in over 100 combinations. Executives, managers, and employees alike—in all industries and sectors—will find useful examples, strategies, and tools here. Praise for Joining Forces This book will help both M&A veterans and those new to the game. The authors provide great insights into the human, cultural, organizational, and strategic factors that matter in M&A success.—Richard Kovacevich, chairman and CEO emeritus, Wells Fargo & Co. Don't commit to the merger or acquisition without them! I have personally witnessed how hard it is on everyone—employees, shareholders, communities, and especially executives—to work through an improperly managed merger. I have known Marks

and Mirvis for almost twenty-five years and the only mistake our organization made was that we did not consult them soon enough. Their new book reflects unequalled experience and intellect. Don't merge, acquire, or be acquired without it!—Michael R. Losey, CEO (emeritus), Society for Human Resources Management (SHRM) *Joining Forces* is a terrific resource for managers who want to understand the human dynamics of mergers and acquisitions, and a must-read for those who have to lead their companies through one. It is based on the latest research and provides practical insights and advice from authors who know M&A inside out. —Edward E. Lawler III, Distinguished Professor of Business, Marshall School of Business, University of Southern California

Practical Feelings Marci D. Cottingham, 2022 *Practical Feelings* develops a novel theory of emotion, combining the sociology of emotion with social practice theory. Chapter 1 theorizes an emotion practice approach by combining symbolic interactionist and poststructural approaches to emotion using their shared lineage of pragmatism. Within this approach, concepts like emotional capital, habitus, and social location together help us examine emotion as effort, energy, and embodied resource. Chapters 2 through 5 apply an emotion practice approach to the domains of work, leisure, social media, and politics. The empirical chapters move from the intimate sphere of nursing to the sphere of public health threats while refining an emotion practice approach. Audio diaries from nurses capture how they use and conserve emotional resources within hierarchies of social class and race. In examining sports fans, we see how they use and invest in the emotional power of sports symbols, but a hierarchy of racial inequality underlies this economy of emotion that connects communities and corporations. Social media users connect with others during health threats by relying on past engrained digital habits of frivolity and humour. Turning to the political sphere, rhetoric from leaders reinforced a view of emotions as irrational, converting dominant emotional capital into political capital during public health threats (Ebola and COVID-19). The final chapter highlights the relevance of homophily for connecting emotions with social inequality and theorizes mechanisms for social change--

Discorrelated Images Shane Denson, 2020-09-18 In *Discorrelated Images* Shane Denson examines how computer-generated digital images displace and transform the traditional spatial and temporal relationships that viewers had with conventional analog forms of cinema. Denson analyzes works ranging from the *Transformers* series and *Blade Runner 2049* to videogames and multimedia installations to show how what he calls discorrelated images—images that do not correlate with the abilities and limits of human perception—produce new subjectivities, affects, and potentials for perception and action. Denson's theorization suggests that new media theory and its focus on technological development must now be inseparable from film and cinema theory. There's more at stake in understanding discorrelated images, Denson contends, than just a reshaping of cinema, the development of new technical imaging processes, and the evolution of film and media studies: discorrelated images herald a transformation of subjectivity itself and are essential to our ability to comprehend nonhuman agency.

The Great Patriotic War of the Soviet Union, 1941-45 Alexander Hill, 2008-12-10 This book consists of extracts from key documents, along with commentary and further reading, on the 'Great Patriotic War' of the Soviet Union against Nazi Germany, 1941-45. Despite the historical significance of the war, few Soviet documents have been published in English. This work provides translations of a range of extracts from Soviet documents relating to the titanic struggle on the Eastern Front during World War II, with commentary. This is the only single-volume work in English to use documentary evidence to look at the Soviet war effort from military, political, economic and diplomatic perspectives. The book should not only facilitate a deeper study of the Soviet war effort, but also allow more balanced study of what is widely known in the West as the 'Eastern Front'. This book will be of much interest to students and scholars of military history, Soviet history, and World War II

history.

What Will It Take to Make A Woman President? Marianne Schnall, 2013-11-05 Prompted by a question from her eight-year-old daughter during the 2008 election of Barack Obama—"Why haven't we ever had a woman president?"—Marianne Schnall set out on a journey to find the answer. A widely published writer, author, and interviewer, and the Executive Director of Feminist.com, Schnall began looking at the issues from various angles and perspectives, gathering viewpoints from influential people from all sectors. What Will It Take to Make A Woman President? features interviews with politicians, public officials, thought leaders, writers, artists, and activists in an attempt to discover the obstacles that have held women back and what needs to change in order to elect a woman into the White House. With insights and personal anecdotes from Sheryl Sandberg, Maya Angelou, Gloria Steinem, Nancy Pelosi, Nicholas Kristof, Melissa Etheridge, and many more, this book addresses timely, provocative issues involving women, politics, and power. With a broader goal of encouraging women and girls to be leaders in their lives, their communities, and the larger world, Schnall and her interviewees explore the changing paradigms occurring in politics and in our culture with the hope of moving toward meaningful and effective solutions—and a world where a woman can be president.

The Last Battle Stephen Harding, 2013-05-07 The incredible story of the unlikely battle of World War II, when a small group of American soldiers joined forces with German soldiers to fight off fanatical SS troops May, 1945. Hitler is dead, the Third Reich is little more than smoking rubble, and no GI wants to be the last man killed in action against the Nazis. The Last Battle tells the nearly unbelievable story of the unlikely battle of the war, when a small group of American tankers, led by Captain Lee, joined forces with German soldiers to fight off fanatical SS troops seeking to capture Castle Itter and execute the stronghold's VIP prisoners. It is a tale of unlikely allies, startling bravery, jittery suspense, and desperate combat between implacable enemies.

Demanding Images Karen Strassler,2020-03-20 The end of authoritarian rule in 1998 ushered in an exhilarating but unsettled period of democratization in Indonesia. A more open political climate converged with a rapidly changing media landscape, yielding a vibrant and volatile public sphere within which Indonesians grappled with the possibilities and limits of democracy amid entrenched corruption, state violence, and rising forms of intolerance. In *Demanding Images* Karen Strassler theorizes image-events as political processes in which publicly circulating images become the material ground of struggles over the nation's past, present, and future. Considering photographs, posters, contemporary art, graffiti, selfies, memes, and other visual media, she argues that people increasingly engage with politics through acts of making, circulating, manipulating, and scrutinizing images. *Demanding Images* is both a closely observed account of Indonesia's turbulent democratic transition and a globally salient analysis of the work of images in the era of digital media and neoliberal democracy. Strassler reveals politics today to be an unruly enterprise profoundly shaped by the affective and evidentiary force of images.

The Maya of Morganton Leon Fink,2003-11-20 The arrival of several hundred Guatemalan-born workers in a Morganton, North Carolina, poultry plant sets the stage for this dramatic story of human struggle in an age of globalization. When laborers' concerns about safety and fairness spark a strike and, ultimately, a unionizing campaign at Case Farms, the resulting decade-long standoff pits a recalcitrant New South employer against an unlikely coalition of antagonists. Mayan refugees from war-torn Guatemala, Mexican workers, and a diverse group of local allies join forces with the Laborers union. The ensuing clash becomes a testing ground for new labor workplace and legal strategies. In the process, the nation's fastest-growing immigrant region encounters a new struggle for social justice. Using scores of interviews, Leon Fink gives voice to a remarkably resilient people. He shows that, paradoxically, what sustains these global travelers are the ties of local community. Whether one is finding a job, going to church, joining a soccer team, or building a union, kin and linguistic connections to the place of one's birth prove crucial in negotiating today's global marketplace. A story set at the intersection of globalization and community, two words not often linked, *The Maya of Morganton* addresses fundamental questions about the changing face of labor in the United States.
