Digital Dead End Virginia Eubanks, 2012-09-21 The realities of the high-tech global economy for women and families in the United States. The idea that technology will pave the road to prosperity has been promoted through both boom and bust. Today we are told that universal broadband access, high-tech jobs, and cutting-edge science will pull us out of our current economic downturn and move us toward social and economic equality. In *Digital Dead End*, Virginia Eubanks argues that to believe this is to engage in a kind of magical thinking: a technological utopia will come about simply because we want it to. This vision of the miraculous power of high-tech development is driven by flawed assumptions about race, class, and gender. The realities of the information age are more complicated, particularly for poor and working-class women and families. For them, information technology can be both a tool of liberation and a means of oppression. But despite the inequities of the high-tech global economy, optimism and innovation flourished when Eubanks worked with a community of resourceful women living at her local YWCA. Eubanks describes a new approach to creating a broadly inclusive and empowering "technology for people," popular technology, which entails shifting the focus from teaching technical skill to nurturing critical technological citizenship, building resources for learning, and fostering social movement. Out of the Shadows, Into the Streets! Sasha Costanza-Chock, 2014-10-31 An exploration of social movement media practices in an increasingly complex media ecology, through richly detailed cases of immigrant rights activism. For decades, social movements have vied for attention from the mainstream mass media—newspapers, radio, and television. Today, many argue that social media power social movements, from the Egyptian revolution to Occupy Wall Street. Yet, as Sasha Costanza-Chock reports, community organizers know that social media enhance, rather than replace, face-to-face organizing. The revolution will be tweeted, but tweets alone do not the revolution make. In *Out of the Shadows, Into the Streets!* Costanza-Chock traces a much broader social movement media ecology. Through a richly detailed account of daily media practices in the immigrant rights movement, the book argues that there is a new paradigm of social movement media making: transmedia organizing. Despite the current spotlight on digital media, Costanza-Chock finds, social movement media practices tend to be cross-platform, participatory, and linked to action. Immigrant rights organizers leverage social media creatively, even as they create media ranging from posters and street theater to Spanish-language radio, print, and television. Drawing on extensive interviews, workshops, and media organizing projects, Costanza-Chock presents case studies of transmedia organizing in the immigrant rights movement over the last decade. Chapters focus on the historic mass protests against the anti-immigrant Sensenbrenner Bill; coverage of police brutality against peaceful activists; efforts to widen access to digital media tools and skills for low-wage immigrant workers; paths to participation in DREAM activism; and the implications of professionalism for transmedia organizing. These cases show us how savvy transmedia organizers work to strengthen movement identity, win political and economic victories, and transform public consciousness forever.

Visual Data Mining Simeon Simoff, Michael H. Böhlen, Arturas Mazeika, 2008-07-23 Visual Data Mining—Opening the Black Box Knowledge discovery holds the promise of insight into large, otherwise opaque datasets. The nature of what makes a rule interesting to a user has been discussed widely but most agree that it is a subjective quality based on the practical usefulness of the information. Being subjective, the user needs to provide feedback to the system and, as is the case for all systems, the sooner the feedback is given the quicker it can influence the behavior of the system. There have been some impressive research activities over the past few years but the question to be asked is why is visual data mining only now being investigated commercially? Certainly, there have been arguments for visual data mining for a number of years - Ankerst and others argued in 2002 that current (autonomous and opaque) analysis techniques are inefficient, as they fail to directly embed the user in dataset exploration and that a better solution involves the user and algorithm being more tightly coupled. Grinstein stated that the “current state of the art data mining tools are automated, but the perfect data mining tool is interactive and highly participatory,” while Han has suggested that the “data selection and viewing of mining

results should be fully interactive, the mining process should be more interactive than the current state of the 2 art and embedded applications should be fairly automated . " A good survey on 3 techniques until 2003 was published by de Oliveira and Levkowitz .

The Coming Jobs War Jim Clifton, 2013-09-16 Definitive leadership strategy for fixing the American economy, drawn from Gallup's unmatched global polling and written by the company's chairman. What everyone in the world wants is a good job. "This is one of the most important discoveries Gallup has ever made," says the company's Chairman, Jim Clifton. In a provocative book for business and government leaders, Clifton describes how this undeniable fact will affect all leadership decisions as countries wage war to produce the best jobs. Leaders of countries and cities, Clifton says, should focus on creating good jobs because as jobs go, so does the fate of nations. Jobs bring prosperity, peace and human development — but long-term unemployment ruins lives, cities and countries. Creating good jobs is tough, and many leaders are doing many things wrong. They're undercutting entrepreneurs instead of cultivating them. They're running companies with depressed workforces. They're letting the next generation of job creators rot in bad schools. A global jobs war is coming, and there's no time to waste. Cities are crumbling for lack of good jobs. Nations are in revolt because their people can't get good jobs. The cities and countries that act first — that focus everything they have on creating good jobs — are the ones that will win. The Coming Jobs War offers a clear, brutally honest look at America's biggest problem and a cogent prescription for solving it.

Digital Objects, Digital Subjects David Chandler, Christian Fuchs, 2019-01-29 This volume explores activism, research and critique in the age of digital subjects and objects and Big Data capitalism after a digital turn said to have radically transformed our political futures. Optimists assert that the 'digital' promises: new forms of community and ways of knowing and sensing, innovation, participatory culture, networked activism, and distributed democracy. Pessimists argue that digital technologies have extended domination via new forms of control, networked authoritarianism and exploitation, dehumanization and the surveillance society. Leading international scholars present varied interdisciplinary assessments of such claims – in theory and via dialogue – and of the digital's impact on society and the potentials, pitfalls, limits and ideologies, of digital activism. They reflect on whether computational social science, digital humanities and ubiquitous datafication lead to digital positivism that threatens critical research or lead to new horizons in theory and society. Ain't Gonna Let Nobody Turn Me Around Alethia Jones, Virginia Eubanks, 2014-11-01 Reveals a remarkable woman's life and her contributions to social justice movements related to Civil Rights, feminism, lesbian and gay liberation, anti-racism, and Black feminism. As an organizer, writer, publisher, scholar-activist, and elected official, Barbara Smith has

played key roles in multiple social justice movements, including Civil Rights, feminism, lesbian and gay liberation, anti-racism, and Black feminism. Her four decades of grassroots activism forged collaborations that introduced the idea that oppression must be fought on a variety of fronts simultaneously, including gender, race, class, and sexuality. By combining hard-to-find historical documents with new unpublished interviews with fellow activists, this book uncovers the deep roots of today's "identity politics" and "intersectionality" and serves as an essential primer for practicing solidarity and resistance. "Barbara Smith is a creator of modern feminism as a writer, organizer, editor, publisher, and scholar. Now she has added to her decades as an activist outside the system by becoming an elected official who truly listens, represents, and creates bridges to a common good. She has shown us that democracy is a seed that can only be planted where we are." "Gloria Steinem "Barbara Smith is one of the grand pioneering and prophetic voices of our time. Her truth still hurts and heals!" "Cornel West "Ain't Gonna Let Nobody Turn Me Around is not a memoir, a biography, nor a reader. It is a reflection and a conversation. It is also a montage of forty years of documents, interviews, and articles that provide useful lessons for social justice work. This book is a tour de force that documents the life's work of Barbara Smith and the freedom struggles she shaped." "Duchess Harris, author of Black Feminist Politics from Kennedy to Obama

Unified Action Partners' Quick Reference Guide United States Army, 2015-09-18 This quick reference guide describes U.S. Army organizations, planning, and operations. Unified action partners (UAPs) are those military forces, of the private sector with whom U.S. Army forces plan, coordinate, synchronize, and integrate during the conduct of operations (Army Doctrine Reference Publication 3-0, Unified Land Operations). UAPs include joint forces (activities in which elements of two or more U.S. military departments participate), multinational forces, and U.S. Government (USG) agencies and departments. The Iraq and Afghanistan wars highlight the necessity for collaboration, cooperation, and synchronization among USG, NGOs, and private sector agencies to focus the elements of national power in achieving national strategic objectives. Our experience in these conflicts accentuates the importance of foreign governments, agencies, and militaries participating, in concert with the United States, to achieve common objectives. Meeting the challenges of complex environments, infused with fragile or failing nation states, non-state actors, pandemics, natural disasters, and limited resources, requires the concerted effort of all instruments of U.S. national power plus foreign governmental agencies, military forces, and civilian organizations.
