The Widening Circle Barry Schwabsky, 1997-07-13 In this collection of critical essays the well-known critic Barry Schwabsky reexamines the art produced since the 1960s, demonstrating how the achievements of high modernism remain consequential to it, through tensions among representation, abstraction, and pictorial language. With the core of the book focused on Michelangelo Pistoletto and Mel Bochner, Schwabsky also studies the work of emerging artists who also continue to examine modernism's legacies.

Materials in Transition Ludwik Dobrzynski, Krystyna Perzyńska, 2006 The main topics covered by this fascinating book, *Materials in Transition*, are the manifold aspects of transient phenomena in condensed matter, the kinetics of phase transitions, catalysis, solid-state reactions, self-organization, etc.

Concrete Planet Robert Courland, 2022-06-21 Concrete: We use it for our buildings, bridges, dams, and roads. We walk on it, drive on it, and many of us live and work within its walls. But very few of us know what it is. We take for granted this ubiquitous substance, which both literally and figuratively comprises much of modern civilization's constructed environment; yet the story of its creation and development features a cast of fascinating characters and remarkable historical episodes. Featuring a new epilogue on the Surfside condominium collapse and the current state of infrastructure in America, this book delves into this history, opening readers' eyes at every turn. In a lively narrative peppered with intriguing details, author Robert Courland describes how some of the most famous personalities of history became involved in the development and use of concrete—including King Herod the Great of Judea, the Roman emperor Hadrian, Thomas Edison (who once owned the largest concrete cement plant in the world), and architect Frank Lloyd Wright. Courland points to recent archaeological evidence suggesting that the discovery of concrete directly led to the Neolithic Revolution and the rise of the earliest civilizations. Much later, the Romans reached extraordinarily high standards for concrete production, showcasing their achievement in iconic buildings like the Coliseum and the Pantheon. Amazingly, with the fall of the Roman Empire, the

secrets of concrete manufacturing were lost for over a millennium. The author explains that when concrete was rediscovered in the late eighteenth century it was initially viewed as an interesting novelty or, at best, a specialized building material suitable only for a narrow range of applications. It was only toward the end of the nineteenth century that the use of concrete exploded. During this rapid expansion, industry lobbyists tried to disguise the fact that modern concrete had certain defects and critical shortcomings. It is now recognized that modern concrete, unlike its Roman predecessor, gradually disintegrates with age. Compounding this problem is another distressing fact: the manufacture of concrete cement is a major contributor to global warming. Concrete Planet is filled with incredible stories, fascinating characters, surprising facts, and an array of intriguing insights into the building material that forms the basis of the infrastructure on which we depend.

Hipster Hitler James Carr, Archana Kumar, 2012-11-01 In a competition of the most hated memes of modern times, Hipster has now caught up with Hitler. Artists James Carr and Archana Kumar thought, why not combine the two? After all, Hitler was indeed a hipster of his time, a failed artist in Vienna scrounging up extra dollars or kroner painting quick architecture scenes for the tourists. In their heavily trafficked website, hipsterhitler.com, these comic artists posit a new sort of history in which Hitler, wears Silverlake-trendy glasses, thrift store sweaters, and outspoken T-shirts, and the reader begins to quickly understand the history of Hitler in a new and strangely engaging way. The Feral House book of Hipster Hitler includes a few dozen pages of comics heretofore unseen online.

Lisbon Fernando Pessoa,2008 Fernando Pessoa wrote this guide to Lisbon, in English, at some point during the 1920s. It was never published and the manuscript was only found amongst his papers long after his death. Its interest is twofold : anything from Pessoa's pen is de facto of interest, but he is also the quintessential city poet, and very much the poet of the city of Lisbon. He loved the city, knew all of its corners, and scarcely left it after his early years there, following his school-days in Durban. The book can still be used as a guide today. The text has been updated only so as to take account of the modern Portuguese spelling of names and places (4e de couv.).
