In the 1820s, the US government began constructing lighthouses to aid mariners navigating the dangerous Florida Reef. While some of the original lights were subsequently destroyed in dramatic circumstances, most that followed, including Carysfort Reef, Alligator Reef, Sombrero Key, Sand Key, and American Shoal, survived intense tropical weather and even major hurricanes. Among the lighthouse keepers were remarkable women who succeeded in a profession usually reserved for men.

Set over the course of a single day, and replete with puns and satirized literary styles, the three authors go darker, stronger, and more global than the blog in book format, including illustrations by acclaimed New Yorker cover artist and cartoonist Harry Bliss.

An Eye for the Tropics Krista A. Thompson, 2007-03-15 Images of Jamaica and the Bahamas as tropical paradises full of palm trees, white sandy beaches, and inviting warm water seem timeless. Surprisingly, the origins of those images can be traced back to the roots of the islands' tourism industry in the 1880s. As Krista A. Thompson explains, in the late nineteenth century, tourism promoters, backed by British colonial administrators, began to market Jamaica and the Bahamas as

picturesque “tropical” paradises. They hired photographers and artists to create carefully crafted representations, which then circulated internationally via postcards and illustrated guides and lectures. Illustrated with more than one hundred images, including many in color, *An Eye for the Tropics* is a nuanced evaluation of the aesthetics of the “tropicalizing images” and their effects on Jamaica and the Bahamas. Thompson describes how representations created to project an image to the outside world altered everyday life on the islands. Hoteliers imported tropical plants to make the islands look more like the images. Many prominent tourist-oriented spaces, including hotels and famous beaches, became off-limits to the islands’ black populations, who were encouraged to act like the disciplined, loyal colonial subjects depicted in the pictures. Analyzing the work of specific photographers and artists who created tropical representations of Jamaica and the Bahamas between the 1880s and the 1930s, Thompson shows how their images differ from the English picturesque landscape tradition. Turning to the present, she examines how tropicalizing images are deconstructed in works by contemporary artists—including Christopher Cozier, David Bailey, and Irénée Shaw—at the same time that they remain a staple of postcolonial governments’ vigorous efforts to attract tourists.

Discovering Patterns in Mathematics and Poetry Marcia Birken, Anne C. Coon, 2008-01-01 You are invited to join a fascinating journey of discovery, as Marcia Birken and Anne C. Coon explore the intersecting patterns of mathematics and poetry — bringing the two fields together in a new way. Setting the tone with humor and illustrating each chapter with countless examples, Birken and Coon begin with patterns we can see, hear, and feel and then move to more complex patterns. Number systems and nursery rhymes lead to the Golden Mean and sestinas. Simple patterns of shape introduce tessellations and concrete poetry. Fractal geometry makes fractal poetry possible. Ultimately, patterns for the mind lead to questions: How do mathematicians and poets conceive of proof, paradox, and infinity? What role does analogy play in mathematical discovery and poetic expression? The book will be of special interest to readers who enjoy looking for connections across traditional disciplinary boundaries. *Discovering Patterns in Mathematics and Poetry* features centuries of creative work by mathematicians, poets, and artists, including Fibonacci, Albrecht Dürer, M. C. Escher, David Hilbert, Benoit

Mandelbrot, William Shakespeare, Edna St. Vincent Millay, Langston Hughes, E.E. Cummings, and many contemporary experimental poets. Original illustrations include digital photographs, mathematical and poetic models, and fractal imagery.
