Getting the Climate Science Facts Right Medani P. Bhandari, 2022-09-01 Getting the Climate Science Facts Right - discusses climate change science with reference to the Intergovernmental Panel on Climate Change (IPCC). Addressing climate change is the most important public priority of the 21st Century. Unlike many issues, however, this issue is being driven by both science and its interface with politics. The main institution for bridging this division between science and international politics is the IPCC. As such it is the main source of the facts from which climate change policy is developed. This book describes the ways in which the IPCC arrives at these facts and so can be sure they are complete and evidence based. Seldom in history has science had such a direct relationship with politics. The negotiation of an international policy regime requires, at its outset, an agreement on the facts. In this case, the facts are scientific, complex and contentious. Governments have recognized this and have, by using the IPCC, set up institutional machinery to provide facts from a source and in a manner that they can accept. The way in which the IPCC functions is unique in that it melds the way in which science achieves consensus with the way governments do at the international level. Starting with a process to examine, review and

debate scientific findings leading to a consensus about scientific fact, usually expressed as probabilities that the findings will hold over time, the IPCC then concludes by using the kind of consensus-development mechanism that the United Nations typically uses to achieve agreements leading to the formation of policy regimes. The book examines the structure of the IPCC, its composition and its procedures in order to achieve an understanding of its role and future.

Wild and Free Handcrafts AFF Ainsley Arment, 2020-03-24 The companion to The Call of the Wild + Free: styled in the lush aesthetic of the Wild + Free brand, a four-color book offering crafts, activities, and essays, that parents, educators, and caregivers can use to inspire their children. Wild + Free Handcrafts is a beautiful, four-color resource book for parents, educators, and caregivers to enjoy doing hands-on activities with kids. It has been used in homeschool settings for decades as one way to encourage them to work with their hands and discover a skillful craft they love to practice. It also is a great way for traditionally educated kids who are home for the summer, or in afterschool programs, or with their families on the weekends, to do fun activities that will stimulate their imaginations and creativity. This book will feature crafts such as: Felted acorns Paper beads Nature wreaths Cocoa mint lip balm Woven willow hearts Finger knit bracelets Eco-dyed kitchen towels Fairy tale treehouse Flower crowns Bug hotel With the same lush photography as The Call of the Wild + Free, this book includes step-by-step pictures that show parents how to do the craft, and essays on the usefulness and purpose of handcrafts as a tool to spark children's curiosity and wonder.

Social Wellbeing and the Values of Small-scale Fisheries Derek S. Johnson, Tim G. Acott, Natasha Stacey, Julie Urquhart, 2017-08-10 This book advances discussions of values in fisheries by showing the rich theoretical insights and connections possible when value is grounded in a multi-dimensional social well being approach. Questions of value have long been a central, if often unacknowledged, concern in maritime studies and in research on fisheries. Social scientists have looked at changing perceptions of value as coastal regions and fisheries have industrialized, economic interconnections have deepened, ecosystems have been depleted, shifts in population have occurred, and governance arrangements have been transformed. With a focus on the diverse ways in which small-scale fisheries are valued, the contributions to this volume address these and other themes through cases from numerous countries in Asia, Europe, and Latin America. "This volume provides a timely contribution to the development of new approaches that seek to capture the complexity of how fisheries can be understood beyond standard mono-dimensional, and often economic, interpretations. Each chapter makes a clear and stand-alone contribution to conceptual and methodological advancement, and collectively these works cover a wide range of

frameworks and schools of thought.” Dr Sarah Coulthard, Senior Lecturer in International Development, Northumbria University, UK “The list of contributing authors [is] impressive and covers a wide geographical range of illustrative examples, [which] helps to demonstrate the global value of small-scale fisheries.” Professor J. Allister McGregor, Professor in Political Economy, the University of Sheffield, UK

Oath and Honor Liz Cheney, 2023-12-05 A gripping first-hand account of the January 6th, 2021, insurrection from inside the halls of Congress, from origins to aftermath, as Donald Trump and his enablers betrayed the American people and the Constitution—by the House Republican leader who dared to stand up to it. In the aftermath of the 2020 presidential election, Donald Trump and many around him, including certain other elected Republican officials, intentionally breached their oath to the Constitution: they ignored the rulings of dozens of courts, plotted to overturn a lawful election, and provoked a violent attack on our Capitol. Liz Cheney, one of the few Republican officials to take a stand against these efforts, witnessed the attack first-hand, and then helped lead the Congressional Select Committee investigation into how it happened. In *Oath and Honor*, she tells the story of this perilous moment in our history, those who helped Trump spread the stolen election lie, those whose actions preserved our constitutional framework, and the risks we still face.
