The Arab-Israeli Conflict P.R. Kumaraswamy,2023-04-24 This book provides a holistic view of the conflict between Israel and its Arab neighbours and studies the global implications of their fraught relations. Focusing on the conflict from its beginning in the late 19th century, the author provides a well-rounded and balanced narrative by examining its religious, ideological, ethnic, political, national, regional and international dimensions. The volume covers a wide range of issues, such as the conflicting historical legacy of the city of Jerusalem, Jewish longing for a homeland, the partition of Palestine, various wars and conflicts since 1948, Palestinian resistance, the Arab Boycott of Israel and the Abraham Accords. It also tackles the contested national claims and the refugee question and looks at various peace-making efforts, including the role of external stakeholders such as the US, UK, Russia and India. A comprehensive study of the Arab-Israeli conflict, the book is richly supported by a swath of references to materials, documents, maps and video links. It will be an essential reading for students, academics and teachers of politics and international relations, national security, geopolitics, history, military and strategic studies, Middle East studies, conflict resolution and peace-making.

Grand Canyon E. H. Watts,2022-01-14 When you visited Yellowstone National Park, did you think to yourself, this does not look like a Volcano? Twenty-nine pieces of evidence suggest Yellowstone is not a volcano. There is a missing planet and an asteroid belt between Jupiter and Mars. Have you ever wondered what made it possible to rain on earth for 40 days and 40 nights as mentioned in Genesis 7:12? In this publication scientific and geological evidence come together to confirm what Genesis has said all along. Have you ever wondered why there are so many underwater cities found all around the world? Are you aware that mass changes gravity? Genesis 19:23-25, states mass came onto earth out of a clear blue sky and buried the cities of Sodom and Gomorrah. Many unexplained mysteries are now explained. Things like: Why does the Coconino sandstone show evidence of vertical deposition? Where did the Coconino sandstone come from? Why is the Earth axis tilted to 23.5 degrees? Why are there no marine fossils above the KT boundary? How did the fountains of the great deep burst forth? Why are dinosaurs drowned and buried in shallow clean mudstone on hill tops in Montana? Evidence supports dinosaurs were wiped out less than 5,000 years ago. Please watch the movie, Is Genesis History. Directed by Thomas Purifoy. 2017; USA: Compass Cinema, 2017. DVD." Evidence supports celestial Impact at Yellowstone and global mass fallout

changing gravity. Gravity change is what made the water vapor canopy become unstable and start falling as rain for 40 days and 40 nights causing global flooding in the year 2,348 B.C.E. Reviews from the first publication, 2018 Excerpt From: E. H. Watts. "Grand Canyon." iBooks. David 5.0 out of 5 stars The 'Watts Theory' is intriguing and creditable. Reviewed in the United States on February 26, 2019 Verified Purchase. Grand Canyon: The Watts Theory ***** "The Watts Theory, while based largely on historic and anecdotal material, is a most engaging hypothesis. Like theories outlined in such books as VanDonikin's 'Chariots of the Gods', Watts presents compelling arguments in support of an alternative view of several of nature's mysteries, including the creation of the Grand Canyon and Yellowstone. While raising as many questions as it endeavors to answer, The 'Watts Theory' is an intriguing and credible explanation of many natural anomalies that remain largely unanswered by pure academic science. I would recommend that anyone interested in geological history, read the 'Watts Theory', with an open mind. It is well researched, documented and thought provoking." Years and years to a common set of beliefs related to landform evolution, and finally now, something different. Over the past decades, I've spent many hours driving through America's desert Southwest. Observing the alluvial fans and terraces of the great basin region along with the upland plateau regions upstream of the drainages that were responsible for the formation of the Grand Canyon have always caused me to question how. Protecting Seniors Against Environmental Disasters Michael R Greenberg, 2014-07-11 The baby boom generation were born between 1946 and 1964 and are the largest population cohort in US history. They should number about 90 million by mid-century, more than doubling their current size. The massive increase in seniors and relative decline of those of working age in the US is mirrored in almost all the world's most populous countries. This book connects the dots between the US baby boom generation and the marked increase in natural and human-caused disasters. It evaluates options available to seniors, their aids, for and not-for and for-profit organizations and government to reduce vulnerability to hazard events. These include coordinated planning, risk assessment, regulations and guidelines, education, and other risk management efforts. Using interviews with experts, cases studies, especially of Superstorm Sandy, and literature, it culls best practice and identify major gaps. It is original and successful in making the connection between the growing group of vulnerable US seniors, environmental events, and risk management practices in order to isolate the most effective lessons learned.

Genetics and Genomics of Cotton Andrew H. Paterson, 2009-03-11 The *Gossypium* (cotton) genus presents novel

opportunities to advance our understanding of the natural world and its organic evolution. In this book, advances of the past decade are summarized and synthesized to elucidate the current state of knowledge of the structure, function, and evolution of the *Gossypium* genome, and progress in the application of this knowledge to cotton improvement. This book provides the first comprehensive reference on cotton genomics.

Waiting to be Heard Bogusia J. Wojciechowska, 2009 *Waiting to be Heard* is the voice of the persecuted, the brave, the hopeful, the betrayed and the determined. It is a testament to the strength of the human spirit and to a generation that did not see itself as 'victims, ' but as 'survivors.' Studies of the War and post-War years have traditionally focused on political and military history. In recent years there has been a greater interest in the social consequences of the War. Nevertheless, discussions relating to the displacement of the Polish-born usually focus on the Holocaust interpreted as a Jewish-only phenomenon. Yet, in the years 1939-45, Poland lost 6,029,000, or 22%, of its total population, including approximately 3 million of its Christian residents. Many of those who survived the War, at its conclusion, were scattered all over the world; by the end of 1945, 249,000 members of the Polish Armed Forces were under British command, with 41,400 dependants in the United Kingdom, Italy, East and South Africa, New Zealand, India, Palestine, Mexico and Western Germany. These refugees have long sought a voice for their experiences. The website, www.PolishDiaspora.net, was created in 2006 by Dr. Wojciechowska as a forum for their voices. The international deluge of interest in the project resulted in *Waiting to be Heard*. While some participants had talked and written about their experiences before, the majority had not discussed their experiences with anyone outside their immediate social circle. And the memories are still painful, as exemplified by one participant who said, God, I ask you; allow me to forget those days and weeks when I lay on piles of corpses in the hope of finding a tiny bit of warmth; allow me to forget the licking of ice from the walls of the cattle wagons; allow me to lose my memory of those years

Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic Erokhin, Vasilii, Gao, Tianming, Zhang, Xiuhua, 2018-12-28 Global interest in the exploration of the Arctic has been growing rapidly. As the Arctic becomes a global resource base and trade corridor between the continents, it is crucial to identify the dangers that such a boom of extractive industries and transport routes may bring on the people and the environment. The *Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic* discusses the perspectives and major challenges of the investment collaboration and development and commercial use of trade routes in the Arctic. Featuring research on topics such as agricultural production, environmental resources, and investment collaboration, this book is ideally designed for policymakers, business leaders, and environmental researchers seeking coverage on new practices and solutions in the sphere of achieving sustainability in economic exploration of the Arctic region.

Trade and Globalization David A. Lynch, 2010-08-16 Regional trade agreements (RTAs) are not new, but their

complexity and importance in global economics and politics has grown exponentially in the past two decades. Tackling this daunting proliferation head on, this book provides a much-needed guide to RTAs. Setting current regional agreements in their economic, political, and historical context, David A. Lynch describes and compares every significant RTA, region by region. He clearly explains their intricate inner workings, their webs of collaboration and conflict, and their primary goals and effectiveness. Lynch's deeply knowledgeable study bridges the ideological divides in scholarly and public debate, including economists' emphases on markets and efficiency versus antiglobalization activists' concerns over inequality and social ills. By building a middle ground between micro and macro analysis and clarifying technical terminology, this concise and accessible book will be an invaluable reference for all readers.

Development Of Amphibious Doctrine Major David C. Emmel, 2015-11-06 Although the U.S. had conducted amphibious operations since the Revolutionary War, it was not until after the Spanish-American War that the military services attempted to codify procedures in doctrine. Early emphasis focused on command relationships and the responsibilities of commanders, eventually expanding to incorporate operational concepts, tactical techniques, and the necessary equipment. In an environment characterized by inter-service rivalry, as well as monetary and materiel constraints, dedicated individuals and organizations overcame numerous obstacles to develop, practice, and successfully execute amphibious operations in World War II. This thesis examines the evolutionary development of amphibious doctrine by the U.S. Marine Corps, Army, and Navy, and the employment of that doctrine during Operations Watchtower and Torch in World War II. The examination includes an analysis of the historical efforts to develop innovative solutions to a wide range of challenges the services faced at the beginning of the 20th Century leading up to World War II. How the leadership solved those challenges informs the efforts of current leadership in addressing contemporary doctrinal, operational, and tactical challenges and those of the future.

Military Geoscience: A Multifaceted Approach to the Study of Warfare Aldino Bondesan, Judy Ehlen, 2022-02-23 This volume presents a selection of papers from the 13th International Conference on Military Geosciences (ICMG), held 24-28 June 2019 in Padua, Italy. It covers a wide range of subjects within the confines of military geoscience written by scientists with a variety of different backgrounds from many countries throughout the world. Many of the papers focus on subjects related to Italy and World War I, but additional subject areas include international perspectives in the military geosciences, international security, geospatial intelligence and remote sensing, subterranean and underground warfare, analyses of historical battlefields and fortifications, and military archaeology. The book will be of interest to academics (e.g., military historians, military archaeologists, military geographers and geologists), applied geoscientists (e.g., engineering geologists and geologists working in other areas of applied geology), professional geoscientists, and those with a general interest in military geoscience and history.

Employment and Labour Market in North-East India Virginius Xaxa, Debdulal Saha, Rajdeep Singha, 2018-08-06 This book examines the structural changes in the labour market in North-East India. Going beyond the conventional study of tea and agricultural sectors, it focuses on the nature, pattern and structure of work and employment in the region as well as documents emerging shifts in the labour force towards farm to non-farm dynamics. The chapters explore historical developments in employment patterns, labour market policies, issues of gender and social-religious dimensions, as well as point to growing forms of casual, informal and contractual labour across sectors. Through large-scale data and detailed case studies on unfree labour in plantations and those employed in crafts, handloom and the manufacturing industry, the book provides insights into labour and employment in the region. It also delves into the temporal and spatial dimensions of non-farm employment and its relationship with rural income distribution and labour mobility. By bringing interdisciplinary perspectives from scholars working on North-East India, this work fills a major gap in the political economy of the labour market in the region. The volume will be useful to scholars and researchers of development studies, North-East India studies, labour studies, economics, sociology and political science as well to those involved with governance and policymaking.

Shale Gas: Ecology, Politics, Economy Sergey S. Zhiltsov, 2017-02-21 This book highlights various aspects of shale gas production and discusses the associated problems, which have greatly influenced the current situation on the global gas market. It focuses on issues such as production technologies, environmental protection, and the impacts of shale gas production on human beings. Further, it investigates the role of shale gas in the development and implementation of foreign policy of many nations that welcomed the possibility to produce this hydrocarbon in their own countries. Taking into consideration the information published by world energy research centers, the prospects of shale gas production in different regions of the world are examined in detail. Given its coverage and scope, the book will greatly benefit specialists in the areas of hydrocarbon production, international relations and foreign policy, world economics and technologies, ecology and environmental protection.

Chinese Global Exploration In The Pre-columbian Era: Evidence From An Ancient World Map Sheng-wei Wang,2023-10-16 How early did the Chinese explore the world? Did the Treasure Fleets, led by Admiral Zheng He, discover many parts of the world before Christopher Columbus? While it is known that Christopher Columbus discovered America and Europe ushered in the Age of Discovery, there is an ongoing debate on the 'unknown' areas depicted in Western maps from the period and earlier. There is agreement among scholars that certain areas seem to have been mapped out prior to the arrival of Western explorers.Chinese Global Exploration in the Pre-Columbian Era: Evidence from an Ancient World Map analyses the world's first modern map — known as Kunyu Wanguo Quantu (KWQ) 坤輿萬國全圖 in Chinese, translated as the 'Complete Geographical Map of All Kingdoms of the World' to demonstrate evidence of Chinese global exploration in the Pre-Columbian era. The map of concern was first printed by Italian missionary, Matteo Ricci in 1602, and has been purported to be of entirely European origin, based on Ricci's former maps which he had brought to China in 1582.This book, thus, seeks to be transformational in presenting essential new insights on Pre-Columbian world history and Chinese global exploration, moving away from the norm of the studies of geography and cartography by:

Commander's Intent Of Major General Joseph Hooker During The Chancellorsville Campaign Major William M. Journey USMC,2015-11-06 Did “Fighting Joe” Hooker of the Army of the Potomac lose his nerve during the Chancellorsville Campaign of 1863? Perhaps history has failed to recognize Major General Joseph Hooker’s true commander’s intent for this campaign. Hooker’s intent was simple: maneuver forces to Lee’s flank and rear in order to force a withdrawal of Confederate troops from Fredericksburg. Hooker had no intention of engaging in a “risky confrontation” with General Robert E. Lee and the Army of Northern Virginia. Hooker’s approach for planning his spring offensive would focus the Army of Potomac’s efforts toward outmaneuvering Lee’s Army of Northern Virginia. Hooker had put forth the idea of moving on Richmond and Lincoln advised him that his objective was Lee’s army and not Richmond. Hooker does pursue Lee’s army, as the main objective and not Richmond as the President had directed but the means that Hooker pursued to that end are misleading. Hooker entered what he considered the initial stage of his spring offensive at Chancellorsville thinking that he would first defeat Lee’s army by maneuver. Prior to Chancellorsville, however, Hooker was already making preparations for driving to Richmond. Hooker had intended to confront Lee with the dilemma of being threatened from all sides. Unfortunately, Hooker had failed to communicate his intentions for his army’s movements of May 1, 1863 and confusion ran rampant among his subordinate commanders. Almost exclusively, Hooker developed the actual details of the plan himself. This flaw would result

in numerous disconnects in Hooker's plan. Hooker's plan would fail due to his own steadfast belief in the ability of his plan to force Lee to withdraw. To say that Lee defeated the Army of the Potomac is misleading because Lee did not defeat the army, he defeated Hooker as he fought a very effective defensive battle that removed the Federal threat from Virginia due to Hooker's failings as an army commander.
