The Unseen Eye William M. Hunt,2011 ... collection of photographs assembled around a particular theme: in each image, the gaze of the subject is averted, the face obscured or the eyes firmly closed. The pictures present a catalog of anti-portraiture, characterized at first glance by what its subjects conceal, not by what the camera reveals. Amassed over the course of thirty years by New York collector W. M. Hunt, the collection includes works by masters such as Richard Avedon, Diane Arbus, Imogen Cunningham, William Klein, Robert Mapplethorpe, and Robert Frank as well as lesser-known artists and vernacular images. --book jacket.

Refuge beyond Reach David Scott FitzGerald, 2019-03-14 Media pundits, politicians, and the public are often skeptical or ambivalent about granting asylum. They fear that asylum-seekers will impose economic and cultural costs and pose security threats to nationals. Consequently, governments of rich, democratic countries attempt to limit who can approach their borders, which often leads to refugees breaking immigration laws. In *Refuge beyond Reach*, David Scott FitzGerald traces how rich democracies have deliberately and systematically shut down most legal paths to safety. Drawing on official government documents, information obtained via WikiLeaks, and interviews with asylum seekers, he finds that for ninety-nine percent of refugees, the only way to find safety in one of the prosperous democracies of the Global North is to reach its territory and then ask for asylum. FitzGerald shows how the US, Canada, Europe, and Australia comply with the letter of law while violating the spirit of those laws through a range of deterrence methods-first designed to keep out Jews fleeing the Nazis-that have now evolved into a pervasive global system of remote control. While some of the most draconian remote control practices continue in secret, Fitzgerald identifies some pressure points and finds that a diffuse humanitarian obligation to help those in need is more difficult for governments to evade than the law alone. *Refuge beyond Reach* addresses one of the world's most pressing challenges-how to manage flows of refugees and other types of migrants-and helps to identify the conditions under which individuals can access the protection of their universal rights.

Traces Bettina Bock von Wülfigen, 2017-07-24 Traces keep time and make the past visible. As such, they continue to be a fundamental resource for scientific knowledge production in modernity. While the art of trace reading is a millennia-old practice, tracings are specifically produced in the photographic archive or in the scientific laboratory. The material traces of the forms represent the objects and causes to which they owe their existence while making them invisible at the moment of their visualization. By looking at different techniques for the production of traces and their changes over two centuries, the contributions show the continuities they have, both in the laboratories and in large colliders of particle physics. This volume, inspired by Carlo Ginzburg's early works, formulates a theory of traces for the 21st century.

The Fourth Industrial Revolution Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Unconscious Bias in Schools Tracey A. Benson, Sarah E. Fiarman, 2020-07-22 In *Unconscious Bias in Schools*, two seasoned educators describe the phenomenon of unconscious racial bias and how it negatively affects the work of educators and students in schools. “Regardless of the amount of effort, time, and resources education leaders put into improving the

academic achievement of students of color,” the authors write, “if unconscious racial bias is overlooked, improvement efforts may never achieve their highest potential.” In order to address this bias, the authors argue, educators must first be aware of the racialized context in which we live. Through personal anecdotes and real-life scenarios, *Unconscious Bias in Schools* provides education leaders with an essential roadmap for addressing these issues directly. The authors draw on the literature on change management, leadership, critical race theory, and racial identity development, as well as the growing research on unconscious bias in a variety of fields, to provide guidance for creating the conditions necessary to do this work—awareness, trust, and a “learner’s stance.” Benson and Fiarman also outline specific steps toward normalizing conversations about race; reducing the influence of bias on decision-making; building empathic relationships; and developing a system of accountability. All too often, conversations about race become mired in questions of attitude or intention—“But I’m not a racist!” This book shows how information about unconscious bias can help shift conversations among educators to a more productive, collegial approach that has the potential to disrupt the patterns of perception that perpetuate racism and institutional injustice. Tracey A. Benson is an assistant professor of educational leadership at the University of North Carolina at Charlotte. Sarah E. Fiarman is the director of leadership development for EL Education, and a former public school teacher, principal, and lecturer at Harvard Graduate School of Education.

Spuren Bettina Bock von Wülfigen, 2017-04-10 Spuren halten die Zeit als Form fest und machen Vergangenes gegenwärtig sichtbar. Als solche sind sie auch in der Moderne ein fundamentales Mittel der wissenschaftlichen Erkenntnisgewinnung geblieben. Doch während die Kunst des Spurenlesens eine jahrtausendealte Praxis darstellt, werden Spurbildungen im fotografischen Archiv oder im naturwissenschaftlichen Labor gezielt hervorgebracht. Dabei ersetzen die materiellen Spurformen nicht selten jene Gegenstände und Ursachen, denen sie ihre Existenz verdanken und die sie im Moment ihrer Vergegenwärtigung unsichtbar machen. Indem die Beiträge des Bandes die verschiedenen Techniken der Erzeugung von Spuren und ihre Veränderungen im Laufe von zwei Jahrhunderten in den Blick nehmen, können sie zugleich aufzeigen, welche Kontinuitäten diese im digitalen Zeitalter oder in der physikalischen Großforschung aufweisen.

bookdown Yihui Xie, 2016-12-12 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for

examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.
