Money Games Weijian Shan, 2020-10-13 *Money Games* is a riveting tale of one of the most successful buyout deals ever: the acquisition and turnaround of what used to be Korea's largest bank by the American firm Newbridge Capital. Full of intrigue and suspense, this insider's account is told by the chief architect of the deal itself, the celebrated author and private equity investor Weijian Shan. With billions of dollars at stake, and the nation's economic future on the line, Newbridge Capital sought to become the first foreign firm in history to take control of one of Korea's most beloved financial institutions. In a proud country still reeling from a humiliating International Monetary Fund bailout in the Asian Financial Crisis, Newbridge Capital had to muster every ounce of skill, determination, and patience to bring the deal to closing. Shan takes readers inside the battle to win control of the bank—a delicate, often exasperating process that meant balancing the goals of Newbridge with those of the government, bank employees, and Korea's powerful industrial titans. Finally, the author describes how Newbridge transformed and rebuilt the struggling bank into a shining example of modern banking—as well as a massively profitable investment. In the secret world of private equity, few buyouts have been written about with such clarity, detail, and insight—and none with such completeness, covering not only the dealmaking but also the transformation and eventual exit of the investment. For anyone who has ever wondered how private equity investors strike bargains, turn around businesses, and create immense value—or anyone interested in a captivating story of high-stakes money-making—this book is a must-read.

Out of the Gobi Weijian Shan, 2019-01-17 Foreword by Janet Yellen Weijian Shan's *Out of the Gobi* is a powerful memoir and commentary that will be one of the most important books on China of our time, one with the potential to re-shape how Americans view China, and how the Chinese view life in America. Shan, a former hard laborer who is now one of Asia's best-known financiers, is thoughtful, observant, eloquent, and brutally honest, making him well-positioned to tell the story of a life that is a microcosm of modern China, and of how, improbably, that life became intertwined with America. *Out of the Gobi* draws a vivid picture of the raw human energy and the will to succeed against all odds. Shan only finished elementary school when Mao Zedong's Cultural Revolution tore his country apart. He was a witness to the brutality and absurdity of Mao's policies during one of the most tumultuous eras in China's history. Exiled to the Gobi Desert at age 15 and denied schooling for 10 years, he endured untold hardships without ever giving up his dream for an education. Shan's improbable journey,

from the Gobi to the “People’s Republic of Berkeley” and far beyond, is a uniquely American success story – told with a splash of humor, deep insight and rich and engaging detail. This powerful and personal perspective on China and America will inform Americans’ view of China, humanizing the country, while providing a rare view of America from the prism of a keen foreign observer who lived the American dream. Says former Federal Reserve chair Janet Yellen: “Shan’s life provides a demonstration of what is possible when China and the United States come together, even by happenstance. It is not only Shan’s personal history that makes this book so interesting but also how the stories of China and America merge in just one moment in time to create an inspired individual so unique and driven, and so representative of the true spirits of both countries.”

Reading Architecture Angeliki Sioli, Yoonchun Jung, 2018-04-09 Why write instead of draw when it comes to architecture? Why rely on literary pieces instead of architectural treatises and writings when it comes to the study of buildings and urban environments? Why rely on literary techniques and accounts instead of architectural practices and analysis when it comes to academic research and educational projects? Why trust authors and writers instead of sociologists or scientists when it comes to planning for the future of cities? This book builds on the existing interdisciplinary bibliography on architecture and literature, but prioritizes literature’s capacity to talk about the lived experience of place and the premise that literary language can often express the inexpressible. It sheds light on the importance of a literary instead of a pictorial imagination for architects and it looks into four contemporary architectural subjects through a wide variety of literary works. Drawing on novels that engage cities from around the world, the book reveals aspects of urban space to which other means of architectural representation are blind. Whether through novels that employ historical buildings or sites interpreted through specific literary methods, it suggests a range of methodologies for contemporary architectural academic research. By exploring the power of narrative language in conveying the experience of lived space, it discusses its potential for architectural design and pedagogy. Questioning the massive architectural production of today’s globalized capital-driven world, it turns to literature for ways to understand, resist or suggest alternative paths for architectural practice. Despite literature’s fictional character, the essays of this volume reveal true dimensions of and for places beyond their historical, social and political reality; dimensions of utmost importance for architects, urban planners, historians and theoreticians nowadays.

Revolutionary Paris and the Market for Netherlandish Art Darius A. Spieth, 2017-11-06 Revolutionary Paris and the Market for Netherlandish Art restores attention to the aesthetic, intellectual, and economic link between two key periods in the history of art: the “Golden Age” of Dutch and Flemish painting and that of the French Revolution.

Louisiana Trail Riders Jeremiah Ariaz, 2018 African American Trail Riding Clubs have their roots in the Creole culture formed in South Louisiana in the eighteenth century. Today trail rides are an opportunity for generations of people to gather, celebrate, and ride horseback. The riders form a distinctive yet little-known sub-culture in Southwest Louisiana. In addition to sharing an important aspect of Louisiana's cultural heritage, Ariaz's photographs assert a counter-narrative to historic representations of the cowboy and prevailing images of difference and despair in Black America.

Experimental Geography Nato Thompson, Independent Curators International, 2015-10-06 A photo of a secret CIA prison. A map designed to help visitors reach Malibu's notoriously inaccessible public beaches. Guidebooks to factories, prisons, and power plants in upstate New York. An artificial reef fabricated from 500 tons of industrial waste. These are some of the more than one hundred projects represented in *Experimental Geography*, a groundbreaking collection of visual research and mapmaking from the past ten years. *Experimental Geography* explores the distinctions between geographical study and artistic experience of the earth, as well as the juncture where the two realms collide (and possibly make a new field altogether). This lavishly illustrated book features more than a dozen maps; artwork by Francis Alÿs, Alex Villar, and Yin Xiuzhen; and recent projects by The Center for Land Use Interpretation, the Raqs Media Collective, and the Center for Urban Pedagogy. The collection is framed by essays by bestselling author Trevor Paglen, Jeffrey Kastner, and editor Nato Thompson.

Landscape Site Grading Principles Bruce G. Sharky, 2014-11-24 A complete guide to site grading for designers and other visual learners *Grading With Design in Mind: Landscape Site Grading Principles* is a comprehensive guide to grading, written specifically from the design perspective. Heavily illustrated and non-technical, this book meets the needs of designers and visual learners by presenting the principles and methods of site grading with less emphasis on engineering, and a strong focus on the effect on the overall aesthetic. Written by a professor in America's number-one ranked undergraduate landscape architecture program, the book guides readers step-by-step through the process of solving various grading problems in real-life scenarios. Landscape designers, landscape architects, and engineers need to have a deep understanding of site grading as the foundation of any project. Grading plans must not only solve practical requirements, but also create landforms that contribute to the aesthetic ambition of the overall site and architectural design concept. *Grading With Design in Mind* takes a highly visual approach to presenting modern grading techniques and considerations, providing designers the guidance they need to become competent in site grading while understanding the design implications of the subject. Features include: Numerous illustrations to support the text Step-by-step examples Professional grading plans Studying the professional grading plans helps readers better understand the real-world application of grading principles in different situations. Site

grading is a complicated topic with plenty of on-site variables, but *Grading with Design in Mind* breaks it down into clear, concise instruction with value to both professionals and students in the field of landscape design.

Developing Creative Thinking in Beginning Design Stephen Temple, 2018-10-03 Learning to think and act creatively is a requisite fundamental aspect of design education for architectural and interior design as well as industrial and graphic design. Development of creative capacities must be encountered early in design education for beginning students to become self-actualized as skillful designers. With chapters written by beginning design instructors, *Developing Creative Thinking in Beginning Design* addresses issues that contribute to deficiencies in teaching creativity in contemporary beginning design programs. Where traditional pedagogies displace creative thinking by placing conceptual abstractions above direct experiential engagement, the approaches presented in this book set forth alternative pedagogies that mitigate student fears and misconceptions to reveal the potency of authentic encounters for initiating creative transformational development. These chapters challenge design pedagogy to address such issues as the spatial body, phenomenological thinking, making as process, direct material engagement and its temporal challenges, creative decision making and the wickedness of design, and the openness of the creative design problem. In doing so, this book sets out to give greater depth to first design experiences and more effectively enable the breadth and depth of the teacher-student relationship as a means of helping your students develop the capacity for long-term self-transformation.

Tangible Modeling with Open Source GIS Anna Petrasova, Brendan Harmon, Vaclav Petras, Helena Mitasova, 2015-12-11 This book presents a new type of modeling environment where users interact with geospatial simulations using 3D physical models of studied landscapes. Multiple users can alter the physical model by hand during scanning, thereby providing input for simulation of geophysical processes in this setting. The authors have developed innovative techniques and software that couple this hardware with open source GRASS GIS, making the system instantly applicable to a wide range of modeling and design problems. Since no other literature on this topic is available, this Book fills a gap for this new technology that continues to grow. *Tangible Modeling with Open Source GIS* will appeal to advanced-level students studying geospatial science, computer science and earth science such as landscape architecture and natural resources. It will also benefit researchers and professionals working in geospatial modeling applications, computer graphics, hazard risk management, hydrology, solar energy, coastal and fluvial flooding, fire spread, landscape, park design and computer games.

Buildings of New Orleans Karen Kingsley, Lake Douglas, 2018 Cradled in the crescent of the Mississippi River and circumscribed by wetlands, New Orleans has faced numerous challenges since its founding as a French colonial outpost in 1718. For three centuries, the city has proved resilient in the face of natural disasters and human activities, and its resulting urban fabric is the product of social, political, commercial, economic, and cultural circumstances that have defined how local residents have interacted with their surroundings.

The Pleasure Garden, from Vauxhall to Coney Island Jonathan Conlin,2012-11-29 Summers at the Vauxhall pleasure garden in London brought diverse entertainments to a diverse public. Picturesque walks and arbors offered a pastoral retreat from the city, while at the same time the garden's attractions indulged distinctly urban tastes for fashion, novelty, and sociability. High- and low-born alike were free to walk the paths; the proximity to strangers and the danger of dark walks were as thrilling to visitors as the fountains and fireworks. Vauxhall was the venue that made the careers of composers, inspired novelists, and showcased the work of artists. Scoundrels, sudden downpours, and extortionate ham prices notwithstanding, Vauxhall became a must-see destination for both Londoners and tourists. Before long, there were Vauxhalls across Britain and America, from York to New York, Norwich to New Orleans. This edited volume provides the first book-length study of the attractions and interactions of the pleasure garden, from the opening of Vauxhall in the seventeenth century to the amusement parks of the early twentieth. Nine essays explore the mutual influences of human behavior and design: landscape, painting, sculpture, and even transient elements such as lighting and music tacitly informed visitors how to move within the space, what to wear, how to behave, and where they might transgress. *The Pleasure Garden, from Vauxhall to Coney Island* draws together the work of musicologists, art historians, and scholars of urban studies and landscape design to unfold a cultural history of pleasure gardens, from the entertainments they offered to the anxieties of social difference they provoked.
