**The Silent Patient** Alex Michaelides, 2019-02-05 **\*\*THE INSTANT #1 NEW YORK TIMES BESTSELLER\*\*** An unforgettable—and Hollywood-bound—new thriller... A mix of Hitchcockian suspense, Agatha Christie plotting, and Greek tragedy. —Entertainment Weekly *The Silent Patient* is a shocking psychological thriller of a woman's act of violence against her husband—and of the therapist obsessed with uncovering her motive. Alicia Berenson's life is seemingly perfect. A famous painter married to an in-demand fashion photographer, she lives in a grand house with big windows overlooking a park in one of London's most desirable areas. One evening her husband Gabriel returns home late from a fashion shoot, and Alicia shoots him five times in the face, and then never speaks another word. Alicia's refusal to talk, or give any kind of explanation, turns a domestic tragedy into something far grander, a mystery that captures the public imagination and casts Alicia into notoriety. The price of her art skyrockets, and she, the silent patient, is hidden away from the tabloids and spotlight at the Grove, a secure forensic unit in North London. Theo Faber is a criminal psychotherapist who has waited a long time for the opportunity to work with Alicia. His determination to get her to talk and unravel the mystery of why she shot her husband takes him down a twisting path into his own motivations—a search for the truth that threatens to consume him....

**Museums and Digital Culture** Tula Giannini,Jonathan P. Bowen,2019-05-06 This book explores how digital culture is transforming museums in the 21st century. Offering a corpus of new evidence for readers to explore, the authors trace the digital evolution of the museum and that of their audiences, now fully immersed in digital life, from the Internet to home and work. In a world where life in code and digits has redefined human information behavior and dominates daily activity and communication, ubiquitous use of digital tools and technology is radically changing the social contexts and purposes of museum exhibitions and collections, the work of museum professionals and the expectations of visitors, real and virtual. Moving beyond their walls, with local and global communities, museums are evolving into highly dynamic, socially aware and relevant institutions as their connections to the global digital ecosystem are strengthened. As they adopt a visitor-centered model and design visitor experiences, their priorities shift to engage audiences, convey digital collections, and tell stories through exhibitions. This is all part of crafting a dynamic and innovative museum identity of the future, made whole by seamless integration with digital culture, digital thinking, aesthetics, seeing and hearing, where visitors are welcomed participants. The international and interdisciplinary chapter contributors include digital artists, academics, and museum professionals. In themed parts the chapters present varied evidence-based research and case studies on museum theory, philosophy, collections, exhibitions, libraries, digital art and digital future, to bring new insights and perspectives, designed to inspire readers. Enjoy the journey!

Staying with the Trouble Donna J. Haraway, 2016-08-19 In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym-poiesis, or making-with, rather than auto-poiesis, or self-making. Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—*Staying with the Trouble* further cements Haraway's reputation as one of the most daring and original thinkers of our time.

50 Vetoes Michael F. Cannon, 2013-03-27 The Patient Protection and Affordable Care Act (PPACA) remains vulnerable to repeal, largely because Congress and the Supreme Court have granted each state the power to veto major provisions of the law before they take effect in 2014. The PPACA itself empowers states to block the employer mandate, to exempt many of their low- and middle-income taxpayers from the individual mandate, and to reduce federal deficit spending, simply by not establishing a health insurance exchange. To date, 34 states have refused to create Exchanges and some 16 states have announced they would not expand their Medicaid programs. Yet the Obama administration is trying to coerce states into implementing parts of the expansion that the Court rendered optional. This special White Paper provides a comprehensive review of the process now occurring between states and the Obama Administration, underscoring how a critical mass of states exercising their vetoes over Exchanges and the Medicaid expansion can force Congress to reconsider, and hopefully repeal, the rest of the PPACA.

**Communicating Climate Change** Anne K. Armstrong, Marianne E. Krasny, Jonathon P. Schuldt, 2018-11-15 Environmental educators face a formidable challenge when they approach climate change due to the complexity of the science and of the political and cultural contexts in which people live. There is a clear consensus among climate scientists that climate change is already occurring as a result of human activities, but high levels of climate change awareness and growing levels of concern have not translated into meaningful action. *Communicating Climate Change* provides environmental educators with an understanding of how their audiences engage with climate change information as well as with concrete, empirically tested communication tools they can use to enhance their climate change program. Starting with the basics of climate science and climate change public opinion, Armstrong, Krasny, and Schuldt synthesize research from

environmental psychology and climate change communication, weaving in examples of environmental education applications throughout this practical book. Each chapter covers a separate topic, from how environmental psychology explains the complex ways in which people interact with climate change information to communication strategies with a focus on framing, metaphors, and messengers. This broad set of topics will aid educators in formulating program language for their classrooms at all levels. Communicating Climate Change uses fictional vignettes of climate change education programs and true stories from climate change educators working in the field to illustrate the possibilities of applying research to practice. Armstrong et al, ably demonstrate that environmental education is an important player in fostering positive climate change dialogue and subsequent climate change action. Thanks to generous funding from Cornell University, the ebook editions of this book are available as Open Access from Cornell Open ([cornellpress.cornell.edu/cornell-open](http://cornellpress.cornell.edu/cornell-open)) and other Open Access repositories.

*Making Broadway Dance* Liza Gennaro,2021 Musical theatre dance is an ever-changing, evolving dance form, egalitarian in its embrace of any and all dance genres. It is a living, transforming art developed by exceptional dance artists and requiring dramaturgical understanding, character analysis, knowledge of history, art, design and most importantly an extensive knowledge of dance both intellectual and embodied. Its ghettoization within criticism and scholarship as a throw-away dance form, undeserving of analysis: derivative, cliché ridden, titillating and predictable, the ugly stepsister of both theatre and dance, belies and ignores the historic role it has had in musicals as an expressive form equal to book, music and lyric. The standard adage, when you can't speak anymore sing, when you can't sing anymore dance expresses its importance in musical theatre as the ultimate form of heightened emotional, visceral and intellectual expression. Through in-depth analysis author Liza Gennaro examines Broadway choreography through the lens of dance studies, script analysis, movement research and dramaturgical inquiry offering a close examination of a dance form that has heretofore received only the most superficial interrogation. This book reveals the choreographic systems of some of Broadway's most influential dance-makers including George Balanchine, Agnes de Mille, Jerome Robbins, Katherine Dunham, Bob Fosse, Savion Glover, Sergio Trujillo, Steven Hoggett and Camille Brown. Making Broadway Dance is essential reading for theatre and dance scholars, students, practitioners and Broadway fans--

Revoked Allison Frankel,2020 [The report] finds that supervision -- probation and parole -- drives high numbers of people, disproportionately those who are Black and brown, right back to jail or prison, while in large part failing to help them get needed services and resources. In states examined in the report, people are often incarcerated for violating the rules of their supervision or for low-level crimes, and receive disproportionate punishment following proceedings that fail to

adequately protect their fair trial rights.--Publisher website.

**Teaming to Innovate** Amy C. Edmondson, 2013-09-05 Innovation requires teaming. (Put another way, teaming is to innovation what assembly lines are to car production.) This book brings together key insights on teaming, as they pertain to innovation. How do you build a culture of innovation? What does that culture look like? How does it evolve and grow? How are teams most effectively created and then nurtured in this context? What is a leader's role in this culture? This little book is a roadmap for teaming to innovate. We describe five necessary steps along that road: Aim High, Team Up, Fail Well, Learn Fast, and Repeat. This path is not smooth. To illustrate each critical step, we look at real-life scenarios that show how teaming to innovate provides the spark that can fertilize creativity, clarify goals, and redefine the meaning of leadership.

**We Learn Nothing** Tim Kreider, 2013-04-09 A New York Times political cartoonist and writer presents a collection of his most popular essays and drawings about life and government hypocrisy, exploring the darkly comic aspects of such topics as falling in love with unlikeable people, managing a friend with outspoken political views and reacting to a long acquaintance's sex-change operation. By the creator of *The Pain--When Will It End?*

**Firefly Hollow** Alison McGhee, 2015-08-18 Because their dreams of daring adventures go against the cautious teachings of their nations, Firefly and Cricket set out on their own, find a home with kindly Vole, and together help a grieving miniature giant named Peter.

**Conservation Biology for All** Navjot S. Sodhi, Paul R. Ehrlich, 2010-01-08 Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

**Pruett and Soo** Nancy Viau, 2022-03-22 Pruet is from Planet Monochrome, where everything is black, white, or gray; everyone follows the rules and walks in straight lines; and they never, ever ask or answer questions. But then Soo arrives

from Planet Prismatic. She's bursting with brilliant colors! She zigs and zags all over the place! When she asks Pruett questions, he finds he wants to reply...and his whole world starts to change. With a palette that shifts from grayscale to full color, this engaging story reminds us that what you feel defines who you are--and, sometimes, a friend can help you see that best.
