Beginning Python Visualization Shai Vaingast, 2014-08-28 We are visual animals. But before we can see the world in its true splendor, our brains, just like our computers, have to sort and organize raw data, and then transform that data to produce new images of the world. *Beginning Python Visualization: Crafting Visual Transformation Scripts, Second Edition* discusses turning many types of data sources, big and small, into useful visual data. And, you will learn Python as part of the bargain. In this second edition you'll learn about Spyder, which is a Python IDE with MATLAB® -like features. Here and throughout the book, you'll get detailed exposure to the growing IPython project for interactive visualization. In addition, you'll learn about the changes in NumPy and Scipy that have occurred since the first edition. Along the way, you'll get many pointers and a few visual examples. As part of this update, you'll learn about matplotlib in detail; this includes creating 3D graphs and using the basemap package that allows you to render geographical maps. Finally, you'll learn about image processing, annotating, and filtering, as well as how to make movies using Python. This includes learning how to edit/open video files and how to create your own movie, all with Python scripts. Today's big data and computational scientists, financial analysts/engineers and web developers – like you – will find this updated book very relevant.

All My Life's a Circle, 2000

The Circle Dave Eggers, 2013-10-08 INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can’t believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What

begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Witches Cynthia A. Roby, 2015-12-15 Over many thousands of years, there have been different ideas of magic and the people who have the ability to make it. Witches have been a group accused of magic-making and causing problems or blessings for various humans. There are thousands of stories about witches from various countries around the world. For just as long as their stories have been around, people have accused others of being witches. This book explores the history of witches in many cultures, ways that witches evolved over time, and their role in society today.

Little Book of Circle Processes Kay Pranis, 2015-01-27 Our ancestors gathered around a fire in a circle, families gather around their kitchen tables in circles, and now we are gathering in circles as communities to solve problems. The practice draws on the ancient Native American tradition of a talking piece. Peacemaking Circles are used in neighborhoods to provide support for those harmed by crime and to decide sentences for those who commit crime, in schools to create positive classroom climates and resolve behavior problems, in the workplace to deal with conflict, and in social services to develop more organic support systems for people struggling to get their lives together. A title in The Little Books of Justice and Peacebuilding Series.

The Circle Time Book Liz Wilmes, Dick Wilmes, 1982 Ideas and activities for the holidays.

Lean In Sheryl Sandberg, 2013-03-11 The #1 international best seller In *Lean In*, Sheryl Sandberg reignited the conversation around women in the workplace. Sandberg is chief operating officer of Facebook and coauthor of *Option B* with Adam Grant. In 2010, she gave an electrifying TED talk in which she described how women unintentionally hold themselves back in their careers. Her talk, which has been viewed more than six million times, encouraged women to "sit at the table," seek challenges, take risks, and pursue their goals with gusto. *Lean In* continues that conversation, combining personal anecdotes, hard data, and compelling research to change the conversation from what women can't do to what they can. Sandberg provides practical advice on negotiation techniques, mentorship, and building a satisfying career. She describes specific steps women can take to combine professional achievement with personal fulfillment, and demonstrates how men can benefit by supporting women both in the workplace and at home. Written with humor and wisdom, *Lean In* is a revelatory, inspiring call to action and a blueprint for individual growth that will empower women around the world to achieve their full potential.

Dupont Circle Paul Kelsey Williams, 2000 From the vast estates of the mid-1800s to the rowhouses built at the end of the 19th century, from Charles Lindbergh's balcony address at the Patterson House to the various political rallies staged in the

urban neighborhood, Washington, D.C.'s Dupont Circle has for many years been at the center of a rich history. Boasting a fascinating heritage of architectural, cultural, and political activity and diversity, the Dupont Circle neighborhood has played a part in the great story of the capital city and has witnessed many of the people and events that have challenged our national community. Following the area's use as a Civil War encampment, Dupont Circle slowly began to develop a more urban character. At the neighborhood's social zenith in the early 1900s, gracious mansions surrounding the circle hosted lavish parties attended by diplomats, presidents, and wealthy socialites. The photographs in this informative visual history capture the elegant homes that were later replaced by office buildings and the fashionable era that was soon to fade. Rare World War II images of former mansions used as rooming houses bring readers into the 20th century, along with the early 1960s photographs of gay activists who gathered at the circle and began the modern restoration of the neighborhood.

Mass Media and the Shaping of American Feminism, 1963-1975 Patricia Bradley, 2009-09-18 Beginning in 1963 with the publication of Betty Friedan's *The Feminine Mystique* and reaching a high pitch ten years later with the televised mega-event of the "Battle of the Sexes"—the tennis match between Billie Jean King and Bobby Riggs—the mass media were intimately involved with both the distribution and the understanding of the feminist message. This mass media promotion of the feminist profile, however, proved to be a double-edged sword, according to Patricia Bradley, author of *Mass Media and the Shaping of American Feminism, 1963-1975*. Although millions of women learned about feminism by way of the mass media, detrimental stereotypes emerged overnight. Often the events mounted by feminists to catch the media eye crystalized the negative image. All feminists soon came to be portrayed in the popular culture as "bra burners" and "strident women." Such depictions not only demeaned the achievements of their movement but also limited discussion of feminism to those subjects the media considered worthy, primarily equal pay for equal work. Bradley's book examines the media traditions that served to curtail understandings of feminism. Journalists, following the craft formulas of their trade, equated feminism with the bizarre and the unusual. Even women journalists could not overcome the rules of "What Makes News." By the time Billie Jean King confronted Bobby Riggs on the tennis court, feminism had become a commodity to be shaped to attract audiences. Finally, in mass media's pursuit of the new, counter-feminist messages came to replace feminism on the news agenda and helped set in place the conservative revolution of the 1980s. Bradley offers insight into how mass media constructs images and why such images have the kind of ongoing strength that discourages young women of today from calling themselves "feminist." The author also asks how public issues are to be raised when those who ask the questions are negatively defined before the issues can even be discussed. *Mass Media and the Shaping of American Feminism, 1963-1975* examines the media's role in creating the images of feminism that continue today. And it poses the dilemma of a call for systematic change in a mass media industry that does not have a place for systematic change in its agenda.

Computational Analysis of Storylines Tommaso Caselli, Eduard Hovy, Martha Palmer, Piek Vossen, 2021-11-25 Event structures are central in Linguistics and Artificial Intelligence research: people can easily refer to changes in the world, identify their participants, distinguish relevant information, and have expectations of what can happen next. Part of this process is based on mechanisms similar to narratives, which are at the heart of information sharing. But it remains difficult to automatically detect events or automatically construct stories from such event representations. This book explores how to handle today's massive news streams and provides multidimensional, multimodal, and distributed approaches, like automated deep learning, to capture events and narrative structures involved in a 'story'. This overview of the current state-of-the-art on event extraction, temporal and casual relations, and storyline extraction aims to establish a new multidisciplinary research community with a common terminology and research agenda. Graduate students and researchers in natural language processing, computational linguistics, and media studies will benefit from this book.

Circle Jeannie Baker, 2020-03-24 "It's hard to imagine a more powerful treatment of migration: Baker conveys the strength of the birds and the fragility of their habitat with equal care." — Publishers Weekly (starred review) Each year, bar-tailed godwits undertake the longest unbroken migration of any bird, flying from their breeding grounds in the Arctic to Australia and New Zealand and back again. They follow invisible pathways — pathways that have been followed for thousands of years — while braving hunger and treacherous conditions to reach their destination. In *Circle*, Jeannie Baker follows the godwits' incredible flight, taking readers over awe-inspiring scenes as the birds spread their wings above such beautiful landmarks as the Great Barrier Reef and China's breathtaking cityscapes for an unforgettable journey.
