Hervé Guibert

Ghost Image Hervé Guibert,2014-03-26 Ghost Image is made up of sixty-three short essays—meditations, memories, fantasies, and stories bordering on prose poems—and not a single image. Hervé Guibert's brief, literary rumination on photography was written in response to Roland Barthes's Camera Lucida, but its deeply personal contents go far beyond that canonical text. Some essays talk of Guibert's parents and friends, some describe old family photographs and films, and spinning through them all are reflections on remembrance, narcissism, seduction, deception, death, and the phantom images that have been missed. Both a memoir and an exploration of the artistic process, Ghost Image not only reveals Guibert's particular experience as a gay artist captivated by the transience and physicality of his media and his life, but also his thoughts on the more technical aspects of his vocation. In one essay, Guibert searches through a cardboard box of family portraits for clues—answers, or even questions—about the lives of his parents and more distant relatives. Rifling through vacation snapshots and the autographed images of long-forgotten film stars, Guibert muses, "I don't even recognize the faces, except occasionally that of an aunt or great-aunt, or the thin, fair face of my mother as a young girl." In other essays, he explains how he composes his photographs, and how—in writing—he seeks to escape and correct the inherent limits of his technique, to preserve those images lost to his technical failings as a photographer. With strains of Jean Genet and recurring themes that speak to the work of contemporary artists across a range of media, Guibert's Ghost Image is a beautifully written, melancholic ode to existence and art forms both fleeting and powerful—a unique memoir at the nexus of family, memory, desire, and photography.

SHEAVES Ludger Hovestadt,Vera Bühlmann,2013-10-09 "SHEAVES" will not describe anything. It will not judge. It will inspire. There are no continuous texts, but a wide range of topics. How to read this book? Take the notions seriously. Search the Internet and they will lose their generalness. They will begin to speak to you vividly. Bundle these riches with the riches of other notions and they will activate each other. Also take the pictures seriously. Photograph or scan them. Use them as an index, while searching the Internet. Again, you will find rich stories. Bundle those riches, concentrate them into new identities that are interesting to you. Let yourself be inspired by the intellectual wealth of our world. You can expand it. It is an exciting adventure, demanding and optimistic.

Take Control of Your Internet Posts: Blog Your Own Way Dale Stubbart, I create my own Websites using HTML and CSS. I've blogged with WordPress for many years. However, I'm always fighting with it to get things formatted my way. I figured if I created my own blogging system, I wouldn't have to do that. So, I created my Radical Blogging Method. You can use it too. I used HTML for the webpage and CSS for the styling. I also used my very easy-to-use Javascript Library to make my webpage more expressive, and to save me a few steps. This can all be done without any Javascript, if you wish. First, I had to figure out what a blogging system does. Then I had to replicate it, well, at least the important steps. My blogging method uses HTML and CSS, just like my webpages do. So, I just write my posts, like I write my webpages. The theme is the same as the other pages of my website, with a few extra features for the Posts. In addition to the posts, there's a list of all the posts. I made that very simple to maintain. And, there's a Feed. This Feed File tells others sites about your posts and it let's readers subscribe to your post. I've set things up, so that it's easy to maintain this feed file. In this book I explain why I did this, how I did it, and how you can use it too. Then I let you draw your own conclusion. Using my Radical Blogging Method saves me time and makes blogging a joy again.

The Archaeology of Sulawesi Sue O'Connor,David Bulbeck,Juliet Meyer,2018-11-14 The central Indonesian island of Sulawesi has recently been hitting headlines with respect to its archaeology. It contains some of the oldest directly dated rock art in the world, and some of the oldest evidence for a hominin presence beyond the southeastern limits of the Ice Age Asian continent. In this volume, scholars from Indonesia and Australia come together to present their research findings and views on a broad range of topics. From early periods, these include observations on Ice Age climate, life in caves and open sites, rock art, and the animals that humans exploited and lived alongside. The archaeology presented from later periods covers the rise of the Bugis kingdom, Chinese trade ceramics, and a range of site-based and regional topics from the Neolithic through to the arrival of Islam. This carefully edited volume is the first to be devoted entirely to the archaeology of the island of Sulawesi, and it lays down a baseline for significant future research. A Quantum City Ludger Hovestadt,Vera Bühlmann,2015-06-16 We know the specific strengths of various cities, are aware of their ranking, are able to discuss their density and growth. But what do all cities have in common, what do we know about the "lowest common denominator"? The "city as a species", the "primal genetic material of the city": this is the subject of A Quantum City. This colossal work is a love letter to the city and intellectual culture. We follow the fictional narrative figure, Orlando, beginning in 320 BC, on his odyssey through the Western world up to the present time. The book is divided into four interrelated chapters and can be read page by page in a discursive manner, however randomly browsing through the book also offers new and multi-faceted interpretations. Great intellectual achievements are compared with obscure and mundane events. A Quantum City offers an inspiring view of the city that is in us and around us.

Epistemics of the Virtual Johan F. Hoorn,2012-01-01 Proposing a new theory of fiction, this work reviews the confusion about perceived realism, metaphor, virtual worlds and the seemingly obvious distinction between what is true and what is false. The rise of new media, new technology, and creative products and services requires a new examination of what 'real' friends are, to what extent scientific novelty is 'true', and whether online content is merely 'figurative'. In this transdisciplinary theory the author evaluates cognitive theories, philosophical discussion, and topics in biology and physics, and places these in the frameworks of computer science and literary theory. The interest of the reader is continuously challenged on matters of truth, fiction, and the shakiness of their belief systems.
