China's Western Frontier and Eurasia Zenel Garcia, 2021-09-16 China has emerged as a dominant power in Eurasian affairs that not only exercises significant political and economic power, but increasingly, ideational power too. Since the founding of the People's Republic, Chinese Communist Party leaders have sought to increase state capacity and exercise more effective control over their western frontier through a series of state-building initiatives. Although these initiatives have always incorporated an international component, the collapse of the USSR, increasing globalization, and the party's professed concerns about terrorism, separatism, and extremism have led to a region-building project in Eurasia. Garcia traces how domestic elite-led narratives about security and development generate state-building initiatives, and then region-building projects. He also assesses how region-building projects are promoted through narratives of the historicity of China's engagement in Eurasia, the promotion of norms of non-interference, and appeals to mutual development. Finally, he traces the construction of regions through formal and informal institutions as well as integrative infrastructure. By presenting three phases of Chinese domestic state-building and region-building from 1988-present, Garcia shows how region-building projects have enabled China to increase state capacity, control, and development in its western frontier. Recommended for scholars of China's international relations and development policy.

Russian Energy Strategy in the European Union, the Former Soviet Union Region, and China Stylianos A. Sotiriou,2014-12-11 This book examines three bipolar relationships that have emerged as a result of the Eurasian energy triangle—Russia-Former Soviet Union region, Russia-EU, and Russia-China—and the ways in which they, along with Putin's foreign energy policy, relate to the debate between neorealism and neoliberal institutionalism.

Oil and Governance David G. Victor,David R. Hults,Mark C. Thurber,2011-12-08 National oil companies (NOCs) play an important role in the world economy. They produce most of the world's oil and bankroll governments across the globe. This book explains the variation in performance and strategy for NOCs and provides fresh insights into the future of the oil industry.

The Second Cold War Luiz Alberto Moniz Bandeira, 2017-05-30 This book investigates the geopolitics and strategic dimensions of US-American foreign policy during George W. Bush's and Barack Obama's presidential terms. Based on a vast amount of empirical and historical sources, the author offers deep insights into the recent political developments ('Arabellions') along the axis of Northern Africa, the Middle East, and Central Asia, situating them in the context of the global geopolitical and geo-economical Great Game, either latent or overt, between USA/NATO and Russia. The author also analyses the influence of the US on these historical and political processes in the last two decades.

The Rise of China and India in Africa Fantu Cheru, Cyril Obi, 2010-03-11 In recent years, China and India have become the most important economic partners of Africa and their footprints are growing by leaps and bounds, transforming Africa's international relations in a dramatic way. Although the overall impact of China and India's engagement in Africa has been positive in the short-term, partly as a result of higher returns from commodity exports fuelled by excessive demands from both countries, little research exists on the actual impact of China and India's growing involvement on Africa's economic transformation. This book examines in detail the opportunities and challenges posed by the increasing presence of China and India in Africa, and proposes critical interventions that African governments must undertake in order to negotiate with China and India from a stronger and more informed platform.

China and Africa Chris Alden, Abiodun Alao, Zhang Chun, Laura Barber, 2017-08-24 This book investigates the expanding involvement of China in security cooperation in Africa. Drawing on leading and emerging scholars in the field, the volume uses a combination of analytical insights and case studies to unpack the complexity of security challenges confronting China and the continent. It interrogates how security considerations impact upon the growing economic and social links China has developed with African states.

Red Roulette Desmond Shum, 2021-09-07 THE BOOK CHINA DOESN'T WANT YOU TO READ.--CNN A riveting insider's story of how the Party and big money work in China today, by a man who, with his wife, Whitney Duan, rose to the zenith of power and wealth--and then fell out of favor. She was disappeared four years ago. News of this book led to a phone call from Whitney, proof that she's alive. As Desmond Shum was growing up impoverished in China, he vowed his life would be

different. Through hard work and sheer tenacity he earned an American college degree and returned to his native country to establish himself in business. There, he met his future wife, the highly intelligent and equally ambitious Whitney Duan who was determined to make her mark within China's male-dominated society. Whitney and Desmond formed an effective team and, aided by relationships they formed with top members of China's Communist Party, the so-called red aristocracy, he vaulted into China's billionaire class. Soon they were developing the massive air cargo facility at Beijing International Airport, and they followed that feat with the creation of one of Beijing's premier hotels. They were dazzlingly successful, traveling in private jets, funding multi-million-dollar buildings and endowments, and purchasing expensive homes, vehicles, and art. But in 2017, their fates diverged irrevocably when Desmond, while residing overseas with his son, learned that his now ex-wife Whitney had vanished along with three coworkers. This is both Desmond's story and Whitney's, because she has not been able to tell it herself.

The New Kings of Crude Luke Patey, 2014-10-15 In the past decade, the need for oil in Asia's new industrial powers, China and India, has grown dramatically. The New Kings of Crude takes the reader from the dusty streets of an African capital to Asia's glistening corporate towers to provide a first look at how the world's rising economies established new international oil empires in Sudan, amid one of Africa's longest-running and deadliest civil wars. For over a decade, Sudan fuelled the international rise of Chinese and Indian national oil companies. But the political turmoil surrounding the historic division of Africa's largest country, with the birth of South Sudan, challenged Asia's oil giants to chart a new course. Luke Patey weaves together the stories of hardened oilmen, powerful politicians, rebel fighters, and human rights activists to show how the lure of oil brought China and India into Sudan--only later to ensnare both in the messy politics of a divided country. His book also introduces the reader to the Chinese and Indian oilmen and politicians who were willing to become entangled in an African civil war in the pursuit of the world's most coveted resource. It offers a portrait of the challenges China and India are increasingly facing as emerging powers in the world.
