The Global Anti-Corruption Regime Hannah Harris, 2018-09-03 This book tackles the challenging topic of corruption. It explores the evolution of a global prohibition regime against corrupt activity (the global anti-corruption regime). It analyses the structure of the transnational legal framework against corruption, evaluating the impact of global anti-corruption efforts at a national level. The book focuses on the United Nations Convention against Corruption (UNCAC) as the primary tool of the global anti-corruption regime. It provides new and engaging material gathered in the field, including first-hand accounts from actors at international, regional, and domestic levels. By documenting the experiences of diverse actors, the book makes a substantial contribution to literature on corruption and anti-corruption efforts. Synthesising empirical research with an exploration of theoretical literature on corruption and regime evolution results in novel suggestions for improvement of the global anti-corruption regime and its legal tools. The Global Anti-Corruption Regime is a well-rounded text with a wealth of new information that will be valuable to both academic and policy audiences. It clarifies the factors that prevent current anti-corruption efforts from successfully eliminating corrupt activity and applies the five-stage model of global prohibition regime evolution to the global anti-corruption regime. It will be of interest to researchers, academics, policymakers, and students interested in anti-corruption law, comparative law, transnational criminal law, international law, international relations, politics, economics, and trade.

God Knows Best: Apec Png 2018: My Way Lahui Ako, 2023-04-10 Lahui Ako, a former diplomat, and PNG APEC Senior Official, recounts the complex, difficult, and sometimes treacherous path he faced in the world of multilateral diplomacy, both by himself, and his country, when it committed to host and chair APEC in 2018. He tells of the political barriers, the diplomatic innuendos, the financial hurdles, and the organizational complexity he encountered, from the planning phases in 2012, right up to being in the cross-fire of the nationalistic Trump officials, and China's aggressive "wolf warrior" diplomats where hard choices had to be made in November, 2018. Ultimately, there won't be a consensus APEC 2018 Leaders' Declaration, but Lahui and his team will acquit themselves well; simply, because, their God knows best.

Asia in the Pacific Islands R. G. Crocombe, 2007 A spectacular transition is under way in the Pacific Islands, as a result

of which all our lives will be radically different. In the last fifty years or so, Asia has begun to play a bigger and bigger role in all aspects of Islands life - migration, trade and investment, aid and development, information and media, religion, culture and sport. It is replacing the West. The process is irreversible. With his trademark breadth and depth of knowledge and understanding of the region, based on over half a century of experience, study and deliberation, Ron Crocombe documents the early connections between Asia and the Pacific, details recent and continuing changes, and poses challenging theories about the future.--Publisher.

International Security and the United States Paul Bellamy, Karl DeRouen Jr., 2007-12-30 Shaped by often very dramatic events, international security and the international system have changed significantly in recent years. The conclusion of the Cold War, the emergence of new political systems, the growth of significant threats such as terrorism, and the development of new security doctrines have driven global transformation. These volumes provide detailed information on countries from every geographic region and continent on the globe, evaluating their relationship with the United States and measuring the potential security threats posed by each. The contributors consider factors such as geography and history; the political systems of each state; their human rights records; the ability to maintain law and order and provide security within their own borders; the impact of current administrations, rulers, or regimes on a nation's foreign policy; and the regional factors that often dictate local politics, in order to make their assessments. All of the entries in this set follow a standardized outline and present a concise, but detailed assessment of each country. Each entry begins with a discussion of geography through which the contributors identify the state's natural resources, environmental issues, and the extent of its territorial jurisdiction. The focus then shifts to social and political organizations. Populations are broken down by not only numbers, but by ethnic and religious affiliations, access to health care, education, housing, and income. All of those aspects are often a reflection of the system of government in place. Like the United States, those governments are comprised of different parties or leaders with various interests. The contributors assess those entities and interests within each country. They measure the ways in which factors of religion, nationalism, and globalism impact and shape not only domestic policies but also foreign policy, and, ultimately, the country's relationship to the United States. Other areas, such as military organizations and activities, records on human rights and justice (recognition of and adherence to international conventions), and national attitudes towards security are also considered. Every entry also includes an assessment of current and potential security issues and an analysis of current terrorist threats that may already be in place or that are beginning to develop in various nations. Each entry concludes with a summary of current relationships with the United States. Those relationships are defined by the identification and brief analysis of formal trade, aid, or military treaties in place between the United States and other nations, the general attitude of a nation's citizenry and its government towards the U.S., and, finally, identifying any social and cultural links between nations and the U.S. (migration patterns, language, economies). Finally, possible changes and

trends that will impact security issues are identified by the contributors. Taken in their entirety, these encyclopedias contain a wealth of information in a concise format that will serve as a valuable reference guide not only for specialists, but general readers as well.

Globalisation and Governance in the Pacific Islands Stewart Firth,2006-12-01 The Pacific Islands are feeling the effects of globalisation. Free trade in sugar and garments is threatening two of Fiji's key industries. At the same time other opportunities are emerging. Labour migration is growing in importance, and Pacific governments are calling for more access to Australia's labour market. Fiji has joined Samoa, Tonga, Tuvalu and Kiribati as a remittance economy, with thousands of its citizens working overseas. Meantime, Papua New Guinea and Solomon Islands grapple with an older kind of globalisation in which overseas companies exploit mineral and forest resources. The Pacific Islands confront unique problems of governance in this era of globalisation. The modern, democratic state often fits awkwardly with traditional ways of doing politics in that part of the world. Just as often, politicians in the Pacific exploit tradition or invent it to serve modern political purposes. The contributors to this volume examine Pacific globalisation and governance from a wide range of perspectives. They come from Papua New Guinea, Solomon Islands, Hawai'i, the Federated States of Micronesia, Samoa, Fiji, New Zealand and Jamaica as well as Australia.--Publisher's description.

In developed countries, emphasis is placed on the role of individuals in environmental decision-making and the protection of their access to the prerequisite environmental information and capacity to challenge environmental decisions is the main focus. However, in developing countries, access to land and natural resources are considered integral elements of environmental justice paradigm. This book focuses on the conceptualization, recognition and protection of environmental justice in developing countries.
