The Educator's Guide to LGBT+ Inclusion Kryss Shane, 2020-05-21 The rates of bullying, truancy due to lack of safety in schools, and subsequent suicidality for LGBT+ youth are exponentially higher than for non-LGBT+ youth. As a result, many American K-12 students are suffering needlessly and many school leaders are unsure of what to do. This book solves that problem. Setting out best practices and professional guidance for creating LGBT+ inclusive learning in schools, this approachable and easy to follow book guides teachers, educators, administrators, and school staff toward appropriate and proven ways to create safer learning environments, update school policies, enhance curricula, and better support LGBT+ youth as they learn. Featuring real-life situations and scenarios, a glossary, and further resources, this book enables professionals in a variety of school roles to integrate foundational concepts into their everyday interactions with students, families, and staff to create an overall school culture that nurtures a welcoming, inclusive, and affirming environment for all. This book can be utilized by independent readers, department teams, and entire school district reading experiences. This book also includes brand new, never before seen postcards from PostSecret as its foreword and its afterword is written by James Lecesne, co-founder of The Trevor Project. Also inside is the very first (and likely only ever) interview by the leaders of Parents of Transgender Children, the world's largest support group of its kind. **An audiobook version will become available in Spring 2020!

The Big Picture Dennis Littky, Samantha Grabelle, 2012-02-17 What is the purpose of education? What kind of people do we want our children to grow up to be? How can we design schools so that students will acquire the skills they'll need to live fulfilled and productive lives? These are just a few of the questions that renowned educator Dennis Littky explores in *The Big Picture: Education Is Everyone's Business*. The schools Littky has created and led over the past 35 years are models for reformers everywhere: small, public schools where the curriculum is rich and meaningful, expectations are high, student progress is measured against real-world standards, and families and communities are actively engaged in the educational process. This book is for both big E and small e educators: * For principals and district administrators who want to change the way schools are run. * For teachers who want students to learn passionately. * For college admissions officers who want diverse applicants with real-world learning experiences. * For business leaders who want a motivated and talented workforce. * For parents who want their children to be prepared for college and for life. * For students who want to take

control over their learning . . . and want a school that is interesting, safe, respectful, and fun. * For anyone who cares about kids. Here, you'll find a moving account of just what is possible in education, with many of the examples drawn from the Metropolitan Regional Career and Technical Center (The Met) in Providence, Rhode Island--a diverse public high school with the highest rates of attendance and college acceptance in the state. The Met exemplifies personalized learning, one student at a time. The Big Picture is a book to reenergize educators, inspire teachers in training, and start a new conversation about kids and schools, what we want for both, and how to make it happen.

Grading for Equity Joe Feldman,2018-09-25 Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact. —Zaretta Hammond, Author of Culturally Responsive Teaching & The Brain Crack open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, *Grading for Equity* provides A critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity,

control students, and endorse a fixed mindset about students' academic potential—practices that are still in place a century later A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a true north orientation toward equitable grading practices Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes, Grading practices are a mirror not just for students, but for us as their teachers. Each one of us should start by asking, What do my grading practices say about who I am and what I believe? Then, let's make the choice to do things differently . . . with Grading for Equity as a dog-eared reference.

Schools That Heal Claire Latane,2021-06-03 What would a school look like if it was designed with mental health in mind? Too many public schools look and feel like prisons, designed out of fear of vandalism and truancy. But we know that nurturing environments are better for learning. Access to nature, big classroom windows, and open campuses consistently reduce stress, anxiety, disorderly conduct, and crime, and improve academic performance. Backed by decades of research, Schools That Heal showcases clear and compelling ways--from furniture to classroom improvements to whole campus renovations--to make supportive learning environments for our children and teenagers. With invaluable advice for school administrators, public health experts, teachers, and parents Schools That Heal is a call to action and a practical resource to create nurturing and inspiring schools for all children.

Learning and Teaching Using ICT in Secondary Schools John Woollard,2007-03-16 Motivated by the conviction that ICT should be used as an effective tool, this book shows how it can support teaching and learning in the classroom and in the virtual world of school intranet, websites and learning platforms. Practical tasks and teaching tips demonstrate how imaginative use of technology can promote creative and enthusiastic teaching, as well as enable new approaches to teaching and learning. It includes descriptions of new technologies and systems and how they can be used, as well as guidance on the software, and activities to engage pupils in their own learning.

Positive Leadership for Flourishing Schools Keith D. Walker,Benjamin Kutsyruba,Sabre Cherkowski,2021-02-01 Most educators will agree that they would love to see each student and staff member in schools flourish. Furthermore, it would be great to see entire communities experience the transformative power of circumstances that feature happy and

vibrant learning. However, what does it mean to experience flourishing in schools? What is the role of positive leadership in this process? What can we learn from inquiring into the positive emotional and social aspects of the work of school leaders? Building on our research on flourishing in schools, this book highlights the stories and perspectives of educators and school leaders at all levels of the school system and demonstrate the intricacies of how positive leadership contributes to well-being in schools and encourages flourishing in these schools. This book aligns with a growing shift in psychology and organizational studies to frame research using phenomena and constructs such as resilience, compassion, hope, efficacy, self-determination and meaningfulness at work and in other areas of life. Research findings from the disciplines of both positive psychology and positive organization studies bring these positive research intelligences into the field of education to study what works in school leadership practices, what goes well, what supports growth, and what brings vitality to people in school organizations. Research in positive psychology contends that attending to the strengths, positive outlooks, habits and mental models, as opposed to a deficit-oriented perspective, is beneficial to increasing subjective wellbeing, by increasing resilience, vitality, and happiness and decreasing stress, anxiety, and depression. How we imagine leading, teaching and learning in schools are implicated in these understandings and help us to contemplate the benefits of focus positive leadership in school organizations. Powerful insights into human inquiry and positive psychology are gained through qualitative study and most of the chapters of this book are grounded in such research. Importantly, chapters in this book provide a varied repertoire of answers to the question that underpins this shift in research toward a positive organizational perspective: How does positive leadership leverage what works well to instill in each community member a sense of their value and capacity to contribute, encourage wellbeing for all and create school contexts of flourishing? This edited collection provides many examples, invitations, and inspiration for readers to notice in their own contexts in ways that encourage them to shift and grow through moving toward appreciative, strengths-based, positive approaches to teaching, learning, and, especially, leading in all school contexts.

Girlhood, Schools, and Media Michele Paule, 2016-09-13 This book explores the circulation and reception of popular discourses of achieving girlhood, and the ways in which girls themselves participate in such circulation. It examines the figure of the achieving girl within wider discourses of neoliberal self-management and post-feminist possibility, considering the tensions involved in being both successful and successfully feminine and the strategies and negotiations girls undertake to manage these tensions. The work is grounded in an understanding of media, educational, and peer contexts for the production of the successful girl. It traces narratives across school, television and online in texts produced for and by girls, drawing on interviews with girls in schools, online forum participation (within the purpose-built site www.smartgirls.tv), and girls' discussions of a range of teen dramas.
