**Coastal Wetlands** Gerardo M.E. Perillo, Eric Wolanski, Donald R. Cahoon, Mark M. Brinson, 2009-01-18 Coastal wetlands are under a great deal of pressure from the dual forces of rising sea level and the intervention of human populations both along the estuary and in the river catchment. Direct impacts include the destruction or degradation of wetlands from land reclamation and infrastructures. Indirect impacts derive from the discharge of pollutants, changes in river flows and sediment supplies, land clearing, and dam operations. As sea level rises, coastal wetlands in most areas of the world migrate landward to occupy former uplands. The competition of these lands from human development is intensifying, making the landward migration impossible in many cases. This book provides an understanding of the functioning of coastal ecosystems and the ecological services that they provide, and suggestions for their management. In this book a CD is included containing color figures of wetlands and estuaries in different parts of the world. \* Includes a CD containing color figures of wetlands and estuaries in different parts of the world.

**Australian Saltmarsh Ecology** Neil Saintilan, 2009 Australian Saltmarsh Ecology presents the first comprehensive review of the ecology and management of Australian saltmarshes. The past 10 years in particular have seen a sustained research effort into this previously poorly understood and neglected resource. In ten chapters contributed by experts in each discipline, the book outlines what is known of the biogeography and geomorphology of Australian saltmarshes, their fish and invertebrate ecology, the use of Australian saltmarshes by birds and insectivorous bats, and the particular challenges of management, including the control of mosquito pests and the issue of sea-level rise. It provides a powerful argument that coastal saltmarsh is a unique and critical habitat vulnerable to the combined impacts of coastal development and sea-level rise.

*Lonely Planet's Where To Go When* Lonely Planet, Sarah Baxter, Paul Bloomfield, 2016-12-01 Where to Go When answers the perennial question of the traveller - where is the best place to visit during every season of the year? Using a combination of infographics and insights from Lonely Planet's network of expert authors, the book will resolve travel dilemmas and present inspiring ideas for the best places to go throughout the year.

### **Restoration of Mangrove Ecosystems** Colin Field,1996

People of the Sea Rita Astuti,1995-03-23 The Vezo, a fishing people of western Madagascar, are known as 'the people who struggle with the sea'. Dr Astuti explores their identity, showing that it is established through what people do rather than being determined by descent. Vezo identity is a 'way of doing' rather than a 'state of being', performative rather than ethnic. However, her innovative analysis of Vezo kinship also uncovers an opposite form of identity based on descent, which she argues is the identity of the dead. By looking at key mortuary rituals that engage the relationship between the living and the dead, Dr Astuti develops a dual model of the Vezo person: the one defined contextually in the present, the other determined by the past.

*Culture on Tour* Edward M. Bruner,2005 Recruited to be a lecturer on a group tour of Indonesia, Edward M. Bruner decided to make the tourists aware of tourism itself. He photographed tourists photographing Indonesians, asking the group how they felt having their pictures taken without their permission. After a dance performance, Bruner explained to the group that the exhibition was not traditional, but instead had been set up specifically for tourists. His efforts to induce reflexivity led to conflict with the tour company, which wanted the displays to be viewed as replicas of culture and to remain unexamined. Although Bruner was eventually fired, the experience became part of a sustained exploration of tourist performances, narratives, and practices. Synthesizing more than twenty years of research in cultural tourism, *Culture on Tour* analyzes a remarkable variety of tourist productions, ranging from safari excursions in Kenya and dance dramas in Bali to an Abraham Lincoln heritage site in Illinois. Bruner examines each site in all its particularity, taking account of global and local factors, as well as the multiple perspectives of the various actors—the tourists, the producers, the locals, and even the anthropologist himself. The collection will be essential to those in the field as well as to readers interested in globalization and travel.

**Consuming St. Patrick's Day** Dominic Bryan,Jonathan Skinner,2015-10-05 There is probably no national day that has such global popularity as St. Patrick's Day. On St. Patrick's Day, it is reputed that 'Everyone is Irish'. What are the factors and factions that give the day such popular appeal? Is St. Patrick's Day the same around the world – in Japan, Northern Ireland and Montserrat – as it is in the Republic of Ireland and the United States? Just how does 'Irishness' figure in the celebration and commemoration of St. Patrick's Day, and how has this day been commoditized, consumed and contested? Does St. Patrick's Day 'belong' to the people, the nation or the brewery? This edited volume brings together the best St. Patrick's Day and Irish Studies scholars from the fields of history, anthropology, sociology, Irish studies, diaspora studies, and cultural studies. The volume thematically explores how St. Patrick's Day has been consumed from the symbolic to the literal, the religious to the political. By doing so, it offers a fresh examination of its importance in contemporary society. This volume will thus appeal to undergraduate and postgraduate students of Irish diaspora studies, and Irish historians and

scholars, as well as to anthropology, sociology and cultural studies students interested in exploring St. Patrick's Day as a case study of globalization, migration and commoditization.

**Wild Ones** Jon Mooallem,2014-05-27 Wild Ones is a tour through our environmental moment and the eccentric cultural history of people and wild animals in America that inflects it. With propulsive curiosity and searing wit, and without that easy moralizing and nature worship of environmental journalism's older guard, [Jon] Mooallem merges reportage, science, and history into a humane and endearing meditation on what it means to live in, and bring life into, a broken world.--Back cover.

**The Cities Book** Lonely Planet Publications (Firm),2009 Cities represent civilisation and human achievement: they are bubbling microcosms of virtues and vices, vanguards of technology and creative pursuits, incubators of traditions and melting-pots of diversity. More than half the world's population now lives in cities, and for travellers they hold an-endless fascination. Here we present the 200 most vibrant, diverse, hypnotic and chaotic cities in the world, ranked in order as voted for by people who know - Lonely Planet's staff, authors, and readers. The list is as diverse as the people that created it. Of course, there are the usual suspects: Paris, London, New York - but also the unfamiliar, the exotic, and the tiny: Abuja (Nigeria), Nuuk (Greenland), Saint-Denis (Réunion) and Ulaanbataar (Mongolia). Every city has its own personality, in the form of its streets and buildings and in its human architecture. Taking our cue from the buzz on the street, we have captured the flavour of each city through the eyes of the typical citizen: hot conversation topics, urban myths, the best places to eat and drink and to seek out after dark. It's a tempting cocktail for the urban adventurer.

**50 years of design** Michèle Champenois,2014 From the white plastic bed for the Prisunic catalogue (1966) to the Culbuto armchair issued by Knoll, and from the Lip watch to the private apartments of the Élysée Palace, Paris, (1983), the furniture and objects conceived by Marc Held have been emblematic of the renewal of French design, following the line of Scandinavians such as Alvar Aalto and Arne Jacobsen... With his gallery L'Échoppe on the rue de Seine, Paris, and then with his agency, the designer and architect Marc Held also took part in major projects for IBM and Renault. This book traces fifty years of design, whose success with the public at large has contributed to a great liberation in our style of life. The

generosity of his vision has remained faithful to the humanist values that guided his childhood in Bagnolet, where he was born in 1932. Having settled in Greece, on the island of Skopelos, over twenty years ago, Marc Held still continues to build houses and furnish them with his creations, working closely with Greek craftsmen. Text in English and French.

The Man who Killed Kitchener Clement Wood, 1996

*Counterfeit Hero* Art Ronnie, 1995 Friends called Duquesne the best company in the world. Prison officials considered him one of the most dangerous criminals in the United States. FBI agents hot on his trail found him likable. At one time or another the South Africa-born soldier of fortune was a prisoner of war, explorer, African hunting adviser to Teddy Roosevelt, inventor, reporter, novelist, publicist for Joseph P. Kennedy's movie company, stockbroker, womanizer, spy, murderer, and certified lunatic. Thanks to the classic 1945 movie *The House on 92nd Street*, he is best remembered as the central figure in a ring of thirty-three Nazi spies arrested in New York City in 1941. FBI director J. Edgar Hoover called their arrest the greatest spy roundup in U.S. history, and their trial was one of the nation's longest and most celebrated. For Duquesne, it was the end of a forty-year adventure.

**Unknown Quantity** Paul Virilio, 2003-01 Writer and critic Paul Virilio is considered to be one of the most important and incisive contemporary critics of technology and its moral, political and cultural implications. His latest catalogue, published to accompany an exhibition he has conceived for the Foundation Cartier in Paris, examines the philosophical issues raised by our confrontation with accidents and their impact on our world. Accidents capture our attention, surprise or shock us, disrupt or ultimately alter the course of our existence. Whether significant or insignificant, benign or disastrous, accidents always reveal something about ourselves and the systems we construct. For Virilio, to invent the ship is to invent the shipwreck, to invent electricity is to invent electrocution. Accidents are consequently, in his view, inherent in all technological systems. This catalogue features over 200 illustrations, including press photographs, paintings and engravings representing natural and industrial accidents from the past three centuries. It also contains reproductions of the works of the many artists included in the exhibit, most notably Lebbeus Woods, Noncy Robins, Stephen Vitiello, Cai Guo Qiang, Bruce Conner, Ton
