*Document-Based Assessment Activities* Cynthia Boyle,Blane Conklin,Kathleen Vest,2009-07-15 Take students beyond textbook history to explore various people and events from ancient Egypt through the 20th Century using primary sources. Students will develop critical-thinking and essay writing skills as they analyze the various documents including photographs, posters, letters, maps, and more. Multiple social studies topics are included for grades K-3, 4-8, and 9-12. This resource includes engaging digital resources and is aligned to College and Career Readiness and other state standards.

**Theory U** C. Otto Scharmer,2009-01-01 Shows how leaders can access the deepest source of inspiration and vision • Includes dozens of tested exercises, practices, and real-world examples We live in a time of massive institutional failure, one that requires a new consciousness and a new collective leadership capacity. In this groundbreaking book, Otto Scharmer invites us to see the world in new ways and in so doing discover a revolutionary approach to leadership. What we pay attention to and how we pay attention is key to what we create. What prevents us from attending to situations more effectively is that we aren't fully aware of and in touch with the inner place from which attention and intention originate. This is what Scharmer calls our blind spot. By moving through Scharmer's U process, we consciously access the blind spot and learn to connect to our authentic Self—the deepest source of knowledge and inspiration—in the realm of “presencing,” a term coined by Scharmer that combines the concepts of presence and sensing. Based on ten years of research and action learning and interviews with over 150 practitioners and thought leaders, Theory U offers a rich diversity of compelling stories and examples and includes dozens of exercises and practices that allow leaders, and entire organizations, to shift awareness, connect with the best future possibility, and gain the ability to realize it.

*Teaching with Fire* Sam M. Intrator,Megan Scribner,2003-10-10 Reclaim Your Fire Teaching with Fire is a glorious collection of the poetry that has restored the faith of teachers in the highest, most transcendent values of their work with children....Those who want us to believe that teaching is a technocratic and robotic skill devoid of art or joy or beauty need to read this powerful collection. So, for that matter, do we all. ?Jonathan Kozol, author of Amazing Grace and Savage Inequalities When reasoned argument fails, poetry helps us make sense of life. A few well-chosen images, the spinning together of words creates a way of seeing where we came from and lights up possibilities for where we might be going....Dip in, read, and ponder; share with others. It's inspiration in the very best sense. ?Deborah Meier, co-principal of The Mission

Hill School, Boston and founder of a network of schools in East Harlem, New York In the Confucian tradition it is said that the mark of a golden era is that children are the most important members of the society and teaching is the most revered profession. Our journey to that ideal may be a long one, but it is books like this that will sustain us - for who are we all at our best save teachers, and who matters more to us than the children? Peter M. Senge, founding chair, SoL (Society for Organizational Learning) and author of *The Fifth Discipline* Those of us who care about the young and their education must find ways to remember what teaching and learning are really about. We must find ways to keep our hearts alive as we serve our students. Poetry has the power to keep us vital and focused on what really matters in life and in schooling. *Teaching with Fire* is a wonderful collection of eighty-eight poems from such well-loved poets as Walt Whitman, Langston Hughes, Billy Collins, Emily Dickinson, and Pablo Neruda. Each of these evocative poems is accompanied by a brief story from a teacher explaining the significance of the poem in his or her life's work. This beautiful book also includes an essay that describes how poetry can be used to grow both personally and professionally. *Teaching With Fire* was written in partnership with the Center for Teacher Formation and the Bill & Melinda Gates Foundation. Royalties from this book will be used to fund scholarship opportunities for teachers to grow and learn.

Creative Acts for Curious People Sarah Stein Greenberg, Stanford d.school, 2021-09-21 WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • "A delightful, compelling book that offers a dazzling array of practical, thoughtful exercises designed to spark creativity, help solve problems, foster connection, and make our lives better."—Gretchen Rubin, New York Times bestselling author and host of the Happier podcast In an era of ambiguous, messy problems—as well as extraordinary opportunities for positive change—it's vital to have both an inquisitive mind and the ability to act with intention. *Creative Acts for Curious People* is filled with ways to build those skills with resilience, care, and confidence. At Stanford University's world-renowned Hasso Plattner Institute of Design, aka "the d.school," students and faculty, experts and seekers bring together diverse perspectives to tackle ambitious projects; this book contains the experiences designed to help them do it. A provocative and highly visual companion, it's a definitive resource for people who aim to draw on their curiosity and creativity in the face of uncertainty. Teeming with ideas about discovery, learning, and leading the way through unknown creative territory, *Creative Acts for Curious People* includes memorable stories and more than eighty innovative exercises. Curated by executive director Sarah Stein Greenberg, after being honed in the classrooms of the d.school, these exercises originated in some of the world's most inventive and unconventional minds, including those of d.school and IDEO founder David M. Kelley, ReadyMade magazine founder Grace Hawthorne, innovative choreographer Aleta Hayes, Google chief innovation evangelist Frederik G. Pferdt, and many more. To bring fresh approaches to any challenge—world changing or close to home—you can draw on exercises such as Expert Eyes to hone observation skills, How to Talk to Strangers to foster understanding, and Designing Tools for Teams to build creative leadership. The activities are at once lighthearted,

surprising, tough, and impactful—and reveal how the hidden dynamics of design can drive more vibrant ways of making, feeling, exploring, experimenting, and collaborating at work and in life. This book will help you develop the behaviors and deepen the mindsets that can turn your curiosity into ideas, and your ideas into action.

**To Hold and Be Held** Daniel K. Reinstein, 2013-05-13 Drawing on the teachings of D.W. Winnicott and John Bowlby, who helped revolutionize thinking about relational psychology, *To Hold and Be Held* integrates the concepts of the ‘holding environment’ and attachment theory and describes how they are applied in a clinical setting. It also uses metaphor to both derive meaning from the language of the therapeutic process and to apply that meaning within a systems framework to effect significant therapeutic change. As the number of children with complex problems increases and the facilities to treat and manage them decrease, schools are left with few resources to cope. Professionals such as teachers, psychologists, social workers, and counselors need a new framework in which to think about and advocate for services for these children. *To Hold and Be Held* describes the creation of a system of working that not only holds the child and his family, but also holds the larger system as well – a system in which therapeutic services are integrated at all levels and implemented in public schools in a way that supports all those involved. This is not only a unique and successful way of working with children and their families, but a timely one as well.

*Dirtmeister's Nitty Gritty Planet Earth* Steve Tomecek, 2015 Come and explore the world under your feet with the *Dirtmeister* and friends! Part graphic novel, part fun guidebook, this very cool, rocky journey introduces both eager and reluctant readers to the basic geologic processes that shape our Earth. Clear and concise explanations of the various geologic processes reveal the comprehensive science behind each fascinating topic. Fun facts and simple DIY experiments reinforce the concepts while short biographies of important scientists inspire future geo-scientists.

Mass Effect Lauren Cornell, Ed Halter, 2015-10-23 Essays, discussions, and image portfolios map the evolution of art forms engaged with the Internet. Since the turn of the millennium, the Internet has evolved from what was merely a new medium to a true mass medium—with a deeper and wider cultural reach, greater opportunities for distribution and collaboration, and more complex corporate and political realities. Mapping a loosely chronological series of formative arguments, developments, and happenings, *Mass Effect* provides an essential guide to understanding the dynamic and ongoing relationship between art and new technologies. *Mass Effect* brings together nearly forty contributions, including newly commissioned essays and reprints, image portfolios, and transcribed discussion panels and lectures that offer insights and reflections from a wide range of artists, curators, art historians, and bloggers. Among the topics examined are the use of commercial platforms for art practice, what art means in an age of increasing surveillance, and questions surrounding such recent concepts as “postinternet.” Other contributions analyze and document particular works by the artists of And/Or Gallery, Cory Arcangel, DIS, Cao Fei, the Radical Software Group, and others. *Mass Effect* relaunches a publication series

initiated by the MIT Press and the New Museum in 1984, which produced six defining volumes for the field of contemporary art. These new volumes will build on this historic partnership and reinvigorate the conversation around contemporary culture once again.
