Envisioning Holograms M. Pell, 2017-11-07 Explore the approach, techniques, and mindshift needed to design truly breakthrough experiences for the Microsoft HoloLens and Windows Mixed Reality platform. Learn what's so different about working with holograms, how to think spatially, and where to start designing your own holographic projects. You'll move rapidly from initial concept to persuasive prototype—all without the need for expensive tools or a designer's skill set. Designing for mixed reality is a completely new experience for everyone involved, and takes some experimentation to get right. You won't nail your first mixed reality project by relying upon your previous mobile or web design expertise as a guide. Mixed reality requires a different kind of design thinking for its unique challenges. Breakthrough holographic design starts with envisioning—the act of visualizing what could be. By rapidly depicting a desired experience and trying out its real-world interactions, you can quickly turn your initial vision into a tangible example of innovative design. *Envisioning Holograms* digs into why holographic computing is the future, takes you through the mixed reality design process, and gets you ready to take advantage of its endless opportunities. Praise for the Book *Envisioning Holograms* is a guidebook for designing our holographic future. You'll find the processes, techniques, and production tools needed to design immersive products that will change how we work, play and communicate." - Tony Parisi, Global Head of AR/VR for Unity. Industry legend. Just as the pioneering work of E.S. Porter helped define a new language for cinematic storytelling at the dawn of motion pictures, *Envisioning Holograms* provides us with the missing vocabulary and grammar to help define a new design language for this world-changing medium of Mixed Reality." - Ori Inbar, Founder and Managing Partner for Super Ventures, an AR/VR fund. An exceptional introduction to a new way of thinking about software. *Envisioning Holograms* is approachable to people just starting out, and also provides some excellent bits of insight to veterans that can help influence their creative process." - Lucas Rizzotto, award-winning creator of Mixed Reality experiences. *Envisioning Holograms* is the perfect book for VR/AR/MR studios that are struggling with application design. It is filled with strategies to acquire ideas, develop and iterate through scenes, and find the best fit. I highly recommend this book to anyone wanting to create solid user experiences using 3D interfaces and spatial computing." - Rick King, authority on the latest trends in AR, VR, and MR development. What You'll

Learn Understand what makes mixed reality a challenging design space See how envisioning quickly and persuasively brings ideas to life Get to know your audience, medium, and palette Explore several innovative rapid envisioning techniques Identify the key elements of your own holographic experience Design an engaging holographic experience from start to finish Who This Book Is For While aimed at those designing for Microsoft HoloLens and the Windows Holographic tool kit, the techniques in the book are equally applicable to those designing for other holographic hardware. This book is for the designer who is new to thinking in 3D and wants to quickly learn best practices, and the developer who needs to do design work while building exciting new products for Microsoft HoloLens, and the marketer who has a great story to tell in this exciting new medium of mixed reality.

The Thermopylae Protocol David Weber, Jacob Holo, 2024-06-04 NEW NOVEL IN THE BEST-SELLING GORDIAN DIVISION SERIES FROM NYT BEST-SELLING AUTHOR DAVID WEBER AND JACOB HOLO: When a ship from an uncharted universe explodes, it soon becomes apparent that someone is building a massive weapon away from the watchful eyes of the Gordian Division. Agent Cho and Detective Cantrell are deployed to get to the bottom of the mystery. If they don't it, means destruction on a universal scale. A Time Storm is Brewing. After an industrial ship carrying advanced self-replicating machines explodes on its way to Mercury, analysis of the wreckage reveals it to be forty years too old. Raibert Kaminski, the Gordian Division's top agent, and his crew on the TransTemporal Vehicle Kleio soon discover the ship was transported to an uncharted universe, one with temporarily accelerated time. Forty years passed for the ship's industrial machines while everyone else experienced only a few short days. Raibert is certain a powerful weapon of some nature has been built out in the unexplored reaches of the multiverse, but where and by whom remains unknown. The search is on, and the Gordian Division musters its fleet of time machines at Providence, a massive transdimensional station under construction. They call upon their allies from the militaristic Admin for aid in their search—but before plans can be formalized, the leader of the Admin's Department of Temporal Investigation is murdered while visiting Providence, and the joint operation is thrown into chaos. Accusations fly and tensions mount between the two organizations. Detectives Isaac Cho and Susan Cantrell—both fast becoming experts in transdimensional crime—are dispatched to Providence. But the clock is ticking for the detectives

Shadow Lessons Daniel Bonnell, 2012-12-12 Imagine waking up one morning at age fifty. You're a noted, published artist whose work hangs all over the world. Then imagine finding yourself standing in front of thirty-five at-risk African American high school students in an inner-city classroom in one of the most difficult high schools in the country. It's your job to teach them, and you've never taught a day in your life. This is the story of an artist who did just that. It is a moving story of a middle-aged white artist who dared to venture into the inner city of Savannah, Georgia, and attempt to teach in one of the first all-black high schools for children of freed slaves in America. Yet *Shadow Lessons* is not another teacher saves the day book. It is a story of beauty and ugliness, life and death, joy and sorrow, laughter and despair. *Shadow Lessons* takes us beyond the classroom on a compelling journey of compassion, healing, and transformation.

Light Shining in Buckinghamshire Caryl Churchill, 2015-04-16 Caryl Churchill's *Light Shining in Buckinghamshire*, set during the English Civil War, tells the story of the men and women who went into battle for the soul of England. Passionate, moving and provocative, it speaks of the revolution we never had and the legacy it left behind. In the aftermath of the Civil War, England stands at a crossroads. Food shortages, economic instability, and a corrupt political system threaten to plunge the country into darkness and despair. The Parliament men who fought against the tyranny of the King now argue for stability and compromise, but the people are hungry for change. For a brief moment, a group of rebels, preachers, soldiers and dissenters dare to imagine an age of hope, a new Jerusalem in which freedom will be restored to the land. Premiered at the Royal Court Theatre, London, in 1976, the play was revived at the National Theatre in 1996 and again in 2015, in a production directed by Lyndsey Turner.

The Choreographic Jenn Joy, 2014-10-10 An investigation of dance and choreography that views them not only as artistic strategies but also as intrinsically theoretical and critical practices. The choreographic stages a conversation in which artwork is not only looked at but looks back; it is about contact that touches even across distance. The choreographic moves between the corporeal and cerebral to tell the stories of these encounters as dance trespasses into the discourse and disciplines of visual art and philosophy through a series of stutters, steps, trembles, and spasms. In *The Choreographic*, Jenn Joy examines dance and choreography not only as artistic strategies and disciplines but also as intrinsically theoretical and critical practices. She investigates artists in dialogue with philosophy, describing a movement of conceptual choreography that flourishes in New York and on the festival circuit. Joy offers close readings of a series of experimental works, arguing for

the choreographic as an alternative model of aesthetics. She explores constellations of works, artists, writers, philosophers, and dancers, in conversation with theories of gesture, language, desire, and history. She choreographs a revelatory narrative in which Walter Benjamin, Pina Bausch, Francis Alÿs, and Cormac McCarthy dance together; she traces the feminist and queer force toward desire through the choreography of DD Dorvillier, Heather Kravas, Meg Stuart, La Ribot, Miguel Gutierrez, Luciana Achugar, and others; she maps new forms of communicability and pedagogy; and she casts science fiction writers Samuel R. Delany and Kim Stanley Robinson as perceptual avatars and dance partners for Ralph Lemon, Marianne Vitali, James Foster, and Janet Cardiff and George Bures Miller. Constructing an expanded notion of the choreographic, Joy explores how choreography as critical concept and practice attunes us to a more productively uncertain, precarious, and ecstatic understanding of aesthetics and art making.

Beggars in Spain Nancy Kress, 2009-05-13 In a world where the slightest edge can mean the difference between success and failure, Leisha Camden is beautiful, extraordinarily intelligent ... and one of an ever-growing number of human beings who have been genetically modified to never require sleep. Once considered interesting anomalies, now Leisha and the other Sleepless are outcasts -- victims of blind hatred, political repression, and shocking mob violence meant to drive them from human society ... and, ultimately, from Earth itself. But Leisha Camden has chosen to remain behind in a world that envies and fears her gift -- a world marked for destruction in a devastating conspiracy of freedom ... and revenge.

Imagining Extinction Ursula K. Heise, 2016-08-10 As the extinction of species accelerates and more species become endangered, activists, filmmakers, writers, and artists have responded to bring this global crisis to the attention of the public. Until now, there has been no study of the frameworks that shape these narratives and images, or of the symbolic meanings that the death of species carries in different cultural communities. Ursula Heise makes the case that understanding how and why endangered species come to matter culturally is indispensable for any effective advocacy on their behalf. Heise begins by showing that the tools of conservation science and law need to be viewed as cultural artifacts: biodiversity databases and laws for the protection of threatened species use rhetorical and cultural resources that open up different approaches to the problem of understanding global wildlife. The second half of her book explores ways of envisioning alternative futures for biodiversity. The narrative of nature's decline or even imminent disappearance has been a successful rallying trope for those skeptical of modernization and ideologies of progress. But environmentalists' nostalgia for the past and pessimistic outlook on the future have also alienated parts of the public. Heise tells the story of environmental activists, writers, and scientists who are creating new stories to guide the environmental imagination.

Sense of Place and Sense of Planet Ursula K. Heise, 2008-09-29 *Sense of Place and Sense of Planet* analyzes the relationship between the imagination of the global and the ethical commitment to the local in environmentalist thought and writing from the 1960s to the present. Part One critically examines the emphasis on local identities and communities in North

American environmentalism by establishing conceptual connections between environmentalism and ecocriticism, on one hand, and theories of globalization, transnationalism and cosmopolitanism, on the other. It proposes the concept of eco-cosmopolitanism as a shorthand for envisioning these connections and the cultural and aesthetic forms into which they translate. Part Two focuses on conceptualizations of environmental danger and connects environmentalist and ecocritical thought with the interdisciplinary field of risk theory in the social sciences, arguing that environmental justice theory and ecocriticism stand to benefit from closer consideration of the theories of cosmopolitanism that have arisen in this field from the analysis of transnational communities at risk. Both parts of the book combine in-depth theoretical discussion with detailed analyses of novels, poems, films, computer software and installation artworks from the US and abroad that translate new connections between global, national and local forms of awareness into innovative aesthetic forms combining allegory, epic, and views of the planet as a whole with modernist and postmodernist strategies of fragmentation, montage, collage, and zooming.

Olafur Eliasson Susan May, 2003 This text looks at Scandinavian artist Olafur Eliasson's approach to the cavernous space of the Turbine Hall at Tate Modern. His work explores human perception of the world and the boundaries between nature, art and technology, and often combines elemental materials with modern technology.
