Precancerous Lesions of the Gynecologic Tract Oluwole Fadare, 2015-11-26 This volume provides a concise yet comprehensive overview of precancerous lesions and gynecologic tract cancers. Each section discusses the historic evolution of a precancerous lesion, its epidemiology, the nature of the published evidence that supports its characterization as a precancerous lesion, and gives a detailed description of morphologic, immunophenotypic and molecular properties, and patient outcomes. The volume also features 2 separate chapters on the clinical management of precancerous lesions of the gynecologic tract as well as the cytopathology of cervical precancerous lesions. Lavishly illustrated and written by some of the foremost experts in the field, *Precancerous Lesions of the Gynecologic Tract: Diagnostic and Molecular Genetic Pathology* is a definitive account of precancerous lesions of the gynecologic tract and is a valuable resource for pathologists, oncologists, and gynecologists.

V for Vendetta Book & Mask Set ALAN. MOORE, 2021-04-27 In a world without political freedom, personal freedom and precious little faith in anything comes a mysterious man in a white porcelain mask who fights political oppressors through terrorism and seemingly absurd acts. It's a gripping tale of the blurred lines between ideological good and evil. The inspiration for the hit 2005 movie starring Natalie Portman and Hugo Weaving, this amazing graphic novel is packaged with a collectable reproduction of the iconic V mask.

It Must've Been Something I Ate Jeffrey Steingarten, 2008-11-26 In this outrageous and delectable new volume, the *Man Who Ate Everything* proves that he will do anything to eat everything. That includes going fishing for his own supply of bluefin tuna belly; nearly incinerating his oven in pursuit of the perfect pizza crust, and spending four days boning and stuffing three different fowl—into each other-- to produce the Cajun specialty called “turducken.” *It Must've Been Something I Ate* finds Steingarten testing the virtues of chocolate and gourmet salts; debunking the mythology of lactose intolerance and Chinese Food Syndrome; roasting marrow bones for his dog, and offering recipes for everything from lobster rolls to

gratin dauphinois. The result is one of those rare books that are simultaneously mouth-watering and side-splitting.

La Buvette Camille Fourmont, Kate Leahy, 2020-07-07 The owner of a beloved Paris wine shop, bar, and café shares the secrets of effortless French entertaining in this lushly photographed guide featuring 50 recipes for simple, grazing-style food. “Camille shows us that keeping it simple, trying new wines, and making food that’s direct is all we need for a great experience.”—Andrew Tarlow, owner of The Marlow Collective Inspired by the stylish, intimate, and laid-back vibes of La Buvette—a tiny wine shop that doubles as a bar and café—in Paris’s 11th Arrondissement, this guide to wine, food, and Parisian lifestyle unlocks the secrets to achieving that coveted *je ne sais quoi* style of entertaining, along with revealing the best of the City of Light. La Buvette’s owner, Camille Fourmont, offers a look into the wine notes she uses to stock her shop and the incredible recipes she prepares in the shop’s miniscule “kitchen” space. She also introduces some of Paris’s best wine and food makers in intimate portraits. Included are fifty recipes for easy and delicious snacks and full meals perfect for impromptu grazing-style entertaining—with plenty of wine—such as Camille’s “famous” Giant Beans with Citrus Zest; Pickled Egg with Furikake; Canned Sardines and Burnt Lemon; Baguette, Butter, and White Peach and Verbena Jam; and Crème Caramel. With tips on selecting wine and sourcing antique kitchenware, recreating the charm and ease of Parisian-style entertaining has never been so enjoyable. Whether you are traveling to Paris or bringing a piece of the City of Light into your home, you’ll learn how to drink, eat, and shop like a true Parisian.

Essentials of Surgical Pediatric Pathology Marta C. Cohen, Irene Scheimberg, 2015-02-05 *Essentials of Surgical Pediatric Pathology* is a clear and practical yet comprehensive guide for trainee pediatric pathologists and non-pediatric pathologists. Each chapter corresponds to one of the main subspecialties, such as dermatopathology, head and neck pathology, and system pathology. Practical guidance is given on handling pediatric specimens and the authors highlight the ways in which common conditions present differently in adults and children. Other chapters cover conditions typical of childhood, including soft tissue tumors and blue round cell tumors. The chapters begin with a brief clinical presentation, followed by a clear macroscopical and histological description of the principal pathologies seen in children. Up-to-date genetic and immunohistochemical information is provided, and the book includes hundreds of high-quality color images. Written and edited by leading international experts in the field, this is an essential resource for trainee pediatric pathologists, as well as general pathologists who may encounter pediatric cases.

Inside Smart Cities Andrew Karvonen, Federico Cugurullo, Federico Caprotti, 2018-09-12 The era of the smart city has arrived. Only a decade ago, the promise of optimising urban services through the widespread application of information and

communication technologies was largely a techno-utopian fantasy. Today, smart urbanisation is occurring via urban projects, policies and visions in hundreds of cities around the globe. *Inside Smart Cities* provides real-world evidence on how local authorities, small and medium enterprises, corporations, utility providers and civil society groups are creating smart cities at the neighbourhood, city and regional scales. Twenty three empirically detailed case studies from the Global North and South – ranging from Cape Town, Stockholm and Abu Dhabi to Philadelphia, Hong Kong and Santiago – illustrate the multiple and diverse incarnations of smart urbanism. The contributors draw on ideas from urban studies, geography, urban planning, science and technology studies and innovation studies to go beyond the rhetoric of technological innovation and reveal the political, social and physical implications of digitalising the built environment. Collectively, the practices of smart urbanism raise fundamental questions about the sustainability, liveability and resilience of cities in the future. The findings are relevant to academics, students, practitioners and urban stakeholders who are questioning how urban innovation relates to politics and place.

Gynecologic and Obstetric Pathology, Volume 1 Wenxin Zheng, Oluwole Fadare, Charles Matthew Quick, Danhua Shen, Donghui Guo, 2019-07-03 This fully indexed, 2-volume book covers all aspects of gynecologic and obstetric pathology. It focuses on practical issues in each chapter by demonstrating pitfalls of diagnosis in addition to general criteria needed for each disease entity. As a reference book on gynecologic and obstetric pathology, it is targeted for practicing pathologists, pathology residents, gynecologic pathology and oncology fellows, clinicians, healthcare providers, and biomedical researchers and is intended for use as a bench or scope side reference, resource for studying for board examinations or to satisfy any interest in certain topics within the field of gynecologic pathology. Volume 1 contains 19 chapters covering disease entities of the vulva, vagina, cervix, and endometrium. It covers all the recognized recent advances within the field. Key diagnostic and differential diagnosis related points are illustrated in numerous tables. In addition, plenty of high quality pictures are presented for the vast majority of entities to facilitate both learning and teaching.

Managing Wine Quality Andrew G. Reynolds, 2010-10-14 Many aspects of both grape production and winemaking influence wine sensory properties and stability. Progress in research helps to elucidate the scientific basis of quality variation in wine and suggest changes in viticulture and oenology practices. The two volumes of *Managing wine quality* review developments of importance to wine producers, researchers, and students. The focus is on recent studies, advanced methods and likely future technologies. Volume 1 opens with chapters reviewing current understanding of wine aroma, colour, taste and mouthfeel. Part two focuses on the measurement of grape and wine properties. Topics covered include instrumental analysis of grape, must and wine, sensory evaluation and wine authenticity and traceability. The effects of viticulture technologies on grape composition and wine quality attributes are the subject of part three. Terroir, viticultural and vineyard management practices, fungal contaminants and grape processing equipment are among the areas discussed. Volume 2

opens with chapters reviewing the impact of different winemaking technologies on quality. Topics covered include yeast and fermentation management, enzymes, ageing on lees, new directions in stabilisation, clarification and fining of white wines and alternatives to cork in wine bottle closures. Managing wine sensory quality is the major focus of part two. Authors consider issues such as cork taint, non-enzymatic oxidation and the impact of ageing on wine flavour deterioration. The volume concludes with chapters on the management of the quality of ice wines and sparkling wines. Reviews current understanding of wine aroma, colour, taste and mouthfeel Details the measurement of grape and wine properties through instrumental analysis, must and wine, and sensory evaluation Reviews the impact of different technologies on wine quality

Walahfrid Strabo's *Libellus de exordiis et incrementis quarundam in observationibus ecclesiasticis rerum*

Alice Harting-Correa, 2021-10-25 The *Libellus* of the Carolingian monk Walahfrid presents a first history of the Eucharistic liturgy, with special reference to topics such as fasting, frequency of communion, and arrangement of sections of the mass. Walahfrid also examines the origins of certain liturgical actions in baptism, traces the development of hymnography, and considers the etymology of various terms for church architecture. Walahfrid's unusually explicit citation of sources makes his work of particular value to the modern historian. This translation is the first into modern English. The commentary establishes the place of the language and argument in the development of early writings on the liturgy, while also relating it to the wider context of non-liturgical writings from the Fathers to mid-ninth century. The author's detailed examinations of Walahfrid's sources—historical, legislative and literary—show the lines of transmission of texts and their availability in the Carolingian period.

The On-line Electric Vehicle Nam P. Suh, Dong Ho Cho, 2017-04-04 This book details the design and technology of the on-line electric vehicle (OLEV) system and its enabling wireless power-transfer technology, the “shaped magnetic field in resonance” (SMFIR). The text shows how OLEV systems can achieve their three linked important goals: reduction of CO₂ produced by ground transportation; improved energy efficiency of ground transportation; and contribution to the amelioration or prevention of climate change and global warming. SMFIR provides power to the OLEV by wireless transmission from underground cables using an alternating magnetic field and the reader learns how this is done. This cable network will in future be part of any local smart grid for energy supply and use thereby exploiting local and renewable energy generation to further its aims. In addition to the technical details involved with design and realization of a fleet of vehicles combined with extensive subsurface charging infrastructure, practical issues such as those involved with pedestrian safety are considered. Furthermore, the benefits of reductions in harmful emissions without recourse to large banks of batteries are made apparent. Importantly, the use of Professor Suh’s axiomatic design paradigm enables such a complicated transportation system to be developed at reasonable cost and delivered on time. The book covers both the detailed design and the relevant systems-engineering knowledge and draws on experience gained in the successful implementation of OLEV

systems in four Korean cities. The introduction to axiomatic design and the in-depth discussion of system and technology development provided by The On-line Electric Vehicle is instructive to graduate students in electrical, mechanical and transportation engineering and will help engineers and designers to master the efficient, timely and to-cost implementation of large-scale networked systems. Managers responsible for the running of large transportation infrastructure projects and concerned with technology management more generally will also find much to interest them in this book.

Judgment of Paris George M. Taber, 2006-11-21 The only reporter present at the mythic Paris Tasting of 1976—a blind tasting where a panel of esteemed French judges chose upstart California wines over France’s best—for the first time introduces the eccentric American winemakers and records the tremendous aftershocks of this historic event that changed forever the world of wine. The Paris Tasting of 1976 will forever be remembered as the landmark event that transformed the wine industry. At this legendary contest—a blind tasting—a panel of top French wine experts shocked the industry by choosing unknown California wines over France’s best. George M. Taber, the only reporter present, recounts this seminal contest and its far-reaching effects, focusing on three gifted unknowns behind the winning wines: a college lecturer, a real estate lawyer, and a Yugoslavian immigrant. With unique access to the main players and a contagious passion for his subject, Taber renders this historic event and its tremendous aftershocks—repositioning the industry and sparking a golden age for viticulture across the globe. With an eclectic cast of characters and magnificent settings, Judgment of Paris is an illuminating tale and a story of the entrepreneurial spirit of the new world conquering the old.

Sexually Transmitted Infections Antonio Cristaudo, Massimo Giuliani, 2020-05-30 This comprehensive, well-illustrated, and easily accessible book documents the latest research outcomes concerning sexually transmitted infections (STIs) and describes important advances in their prevention, diagnosis and treatment. The changes in the epidemiology and clinical aspects of STIs that have occurred over the past decade are fully explored, with special attention to core groups and patients with immunological disorders. The emerging challenges associated with particular sexually transmitted pathogens, including *C. trachomatis*, *N. gonorrhoeae*, HPV, and HIV, are identified and discussed. Readers will find detailed information on modern preventive strategies, new laboratory and diagnostic techniques, and a range of innovative treatments, including vaccines, continuous antiretroviral therapy, and new drugs against hepatitis viruses. Attention is also drawn to new directions in biomedical research that promise clinical benefits for the patients and communities. The combination of a detailed clinical and research approach, with emphasis on new knowledge and innovative aspects, ensures that the book will be of value to a wide readership comprising both clinicians and researchers.

A Collection of Familiar Quotations John Bartlett, 1856

Multimedia Systems and Techniques Borko Furht, 2012-12-06 Multimedia computing has emerged in the last few years as a major area of research. Multimedia computer systems have opened a wide range of applications by combining a variety of

information sources, such as voice, graphics, animation, images, audio and full-motion video. Looking at the big picture, multimedia can be viewed as the merging of three industries: computer, communications, and broadcasting industries. Research and development efforts can be divided into two areas. As the first area of research, much effort has been centered on the stand-alone multimedia workstation and associated software systems and tools, such as music composition, computer-aided education and training, and interactive video. However, the combination of multimedia computing with distributed systems offers even greater potential. New applications based on distributed multimedia systems include multimedia information systems, collaborative and video conferencing systems, on-demand multimedia services, and distance learning. Multimedia Systems and Techniques is one of two volumes published by Kluwer, both of which provide a broad introduction into this fast moving area. The book covers fundamental concepts and techniques used in multimedia systems. The topics include multimedia objects and related models, multimedia compression techniques and standards, multimedia interfaces, multimedia storage techniques, multimedia communication and networking, multimedia synchronization techniques, multimedia information systems, scheduling in multimedia systems, and video indexing and retrieval techniques. Multimedia Systems and Techniques, together with its companion volume, Multimedia Tools and Applications, is intended for anyone involved in multimedia system design and applications and can be used as a textbook for advanced courses on multimedia.

Healthcare Informatics for Fighting COVID-19 and Future Epidemics Lalit Garg, Chinmay Chakraborty, Saïd Mahmoudi, Victor S. Sohmen, 2021-09-01 This book presents innovative solutions utilising informatics to deal with various issues related to the COVID-19 outbreak. The book offers a collection of contemporary research and development on the management of Covid-19 using health data analytics, information exchange, knowledge sharing, the Internet of Things (IoT), and the Internet of Everything (IoE)-based solutions. The book also analyses the implementation, assessment, adoption, and management of these healthcare informatics solutions to manage the pandemic and future epidemics. The book is relevant to researchers, professors, students, and professionals in informatics and related topics.
