**Biomimetic Architecture and Its Role in Developing Sustainable, Regenerative, and Livable Cities** Mohsen

Aboulnaga, Samaa E. Helmy, 2022-09-01 This book focuses on understanding biomimetic architecture and its role as a sustainable design tool. It presents the role of biomimicry in mitigation and adaptation to climate change and examines how biomimetic architecture can provide healthy solutions to limit the spread of COVID-19 in buildings and cities. Coverage includes global examples of biomimetic approaches and buildings, an evaluation of the performance of biomimicry applications in architecture to illustrate best practices, and an exploration of how nature can offer inspiration in building design to conserve resources and save energy use as well as curb carbon emissions - a reaffirmed goal of COP 26 and an outcome of Glasgow Climate Pact. Finally, the book presents guidelines to enhance urban areas and healthier spaces in buildings to meet COVID-19 social distance regulations and beyond. Examines global applications of biomimicry in architecture; Highlights the importance of biomimicry in driving livability in cities and buildings; Explores the role of biomimetic architecture in mitigating climate change. "The line of argument developed is highly relevant to the present, in addition to being original and pertinent to research on urban regeneration, especially in regard to the exploration of the use of biomimicry architecture in response to changing urban demands." —Alessandra Battisti, Ph.D., Professor of Architecture, University of Rome La Sapienza-

*The Book of Change* Stephen Ellcock, 2021-10-26 A better world is within our grasp, let art show you the way. A collection of radically beautiful and provocative images from one of the world's most-followed and best-loved digital curators Stephen Ellcock. The Book of Change is designed to provoke reflection, revelation and action, an indispensable treasury of visual tools that will aid, promote and inspire personal and political transformations. This new collection of extraordinary images is structured as a journey beginning with mankind's origins. Our path is marked by words and images reflecting our talent both for creativity and conflict. Ultimately Stephen Ellcock leads the reader to the current, turbulent point in time. A time of global unrest, inequality and--yet--potential for change. Ellcock draws on both well-known and entirely unknown artists, Renaissance paintings, counter-cultural iconography, occult and esoteric imagery, documentary photography and traditional and contemporary art, craft and design from every continent and cultural tradition. This is an eye-opening, mind-blowing awakening to the vast shared potential and creative energy of mankind.

**The Book of Hopes** Katherine Rundell, 2020-10-01 \_\_\_\_\_ Shortlisted for Waterstones Book of the Year \_\_\_\_\_ In difficult times, what children really need is hope. And in that spirit, bestselling author Katherine Rundell emailed some of the children's writers and artists whose work she loved most: 'I asked them to write something very short, fiction or non-fiction, or draw something that would make the children reading it feel like possibility-ists: something that would make them laugh or wonder or snort or smile. The response was magnificent, which shouldn't have surprised me, because children's writers and illustrators are professional hunters of hope ... I hope that the imagination can be a place of shelter for children and that The Book of Hopes might be useful in that, even if only a little.' This collection, packed with short stories, poems and pictures from the very best children's authors and illustrators, aims to provide just that. Within its pages you'll find animal friends from insects to elephants, high-flying grandmas, a homesick sprite, the tooth fairy, and even extra-terrestrial life. There are 133 contributions from authors and illustrators, including Anthony Horowitz, Axel Scheffler, Catherine Johnson, Jacqueline Wilson, Katherine Rundell, Lauren Child, Michael Morpurgo and Onjali Q. Raúf. A donation from the sale of each book will go to NHS Charities Together, in gratitude for the incredible efforts of all those who worked in hospitals over the quarantine period. \_\_\_\_\_ 'An anthology on the theme of hope ... it includes a rich range of images, poetry, stories and non-fiction' - Sunday Times, 'Stories to charm on endless days' Proceeds from this book will be

donated to NHS Charities Together. In respect of UK sales, this will be £2.10 and in respect of sales in other territories this will be 16% of net receipts (at least 62p). NHS Charities Together is a charity registered in England and Wales (registered charity no. 1186569).

**Machine Intelligence and Signal Processing** Richa Singh, Mayank Vatsa, Angshul Majumdar, Ajay Kumar, 2015-10-01 This book comprises chapters on key problems in machine learning and signal processing arenas. The contents of the book are a result of a 2014 Workshop on Machine Intelligence and Signal Processing held at the Indraprastha Institute of Information Technology. Traditionally, signal processing and machine learning were considered to be separate areas of research. However in recent times the two communities are getting closer. In a very abstract fashion, signal processing is the study of operator design. The contributions of signal processing had been to device operators for restoration, compression, etc. Applied Mathematicians were more interested in operator analysis. Nowadays signal processing research is gravitating towards operator learning – instead of designing operators based on heuristics (for example wavelets), the trend is to learn these operators (for example dictionary learning). And thus, the gap between signal processing and machine learning is fast converging. The 2014 Workshop on Machine Intelligence and Signal Processing was one of the few unique events that are

focused on the convergence of the two fields. The book is comprised of chapters based on the top presentations at the workshop. This book has three chapters on various topics of biometrics – two are on face detection and one on iris recognition; all from top researchers in their field. There are four chapters on different biomedical signal / image processing problems. Two of these are on retinal vessel classification and extraction; one on biomedical signal acquisition and the fourth one on region detection. There are three chapters on data analysis – a topic gaining immense popularity in industry and academia. One of these shows a novel use of compressed sensing in missing sales data interpolation. Another chapter is on spam detection and the third one is on simple one-shot movie rating prediction. Four other chapters cover various cutting edge miscellaneous topics on character recognition, software effort prediction, speech recognition and non-linear sparse recovery. The contents of this book will prove useful to researchers, professionals and students in the domains of machine learning and signal processing.

Natural Language Processing Recipes Akshay Kulkarni, Adarsha Shivananda, 2019-01-29 Implement natural language processing applications with Python using a problem-solution approach. This book has numerous coding exercises that will help you to quickly deploy natural language processing techniques, such as text classification, parts of speech identification, topic modeling, text summarization, text generation, entity extraction, and sentiment analysis. Natural Language Processing Recipes starts by offering solutions for cleaning and preprocessing text data and ways to analyze it with advanced algorithms. You'll see practical applications of the semantic as well as syntactic analysis of text, as well as complex natural language processing approaches that involve text normalization, advanced preprocessing, POS tagging, and sentiment analysis. You will also learn various applications of machine learning and deep learning in natural language processing. By using the recipes in this book, you will have a toolbox of solutions to apply to your own projects in the real world, making your development time quicker and more efficient. What You Will Learn Apply NLP techniques using Python libraries such as NLTK, TextBlob, spaCy, Stanford CoreNLP, and many more Implement the concepts of information retrieval, text summarization, sentiment analysis, and other advanced natural language processing techniques. Identify machine learning and deep learning techniques for natural language processing and natural language generation problems Who This Book Is For Data scientists who want to refresh and learn various concepts of natural language processing through coding exercises.

*Ciprian Honey Cathedral*, 2020 Raymond Meeks is renowned for his use of photography and the book form to poetically distill the liminal junctures of vision, consciousness and comprehension. In 'ciprian honey cathedral', he brings this scrutiny

close to home, delicately probing at the legibility of our material surroundings and the people closest to us. Meeks has long been fascinated by the way we construct the world around us; how we carry our possessions, these accumulated comforts, inheritances, markers of material success; how we adorn homes with trees and shrubs, a mantle clock to count the hours. Stumbling across an abandoned house or unkempt lawn becomes a search for common clues to tiny hidden transgressions. This question of knowledge and understanding is perhaps most drastic in our solipsistic reality. Meeks also photographed his partner, Adrianna Ault, in the early mornings before she awoke, on the threshold at which daily domestic life converges with the deepest state of sleep. This plight of supine trance is a place of reprieve beneath the surface of consciousness, free from the chaos and uncertainty of the sentient world above, and alludes to the veiled threat that, ultimately, we are utterly unknowable to one another.--Publisher's web page for the book.

*Start with Why* Simon Sinek, 2011-12-27 The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.
